CENSUS

OF THE COMMONWEALTH OF

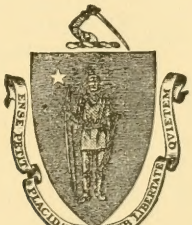
MASSACHUSETTS

1905

PREPARED UNDER THE DIRECTION OF THE CHIEF OF THE BUREAU OF STATISTICS OF LABOR

VOLUME I

POPULATION AND SOCIAL STATISTICS



BOSTON
WRIGHT & POTTER PRINTING CO., STATE PRINTERS
18 POST OFFICE SQUARE
1909

Approved by
the State Board of Publication.

TABLE OF CONTENTS.

INTRODUCTION.

Page

Introductory remarks, ... 19
The Census Law of 1905, ... 1, 408
The enumeration, ... 409, 410
Tabulation and publication, ... 312, 313
Cost of the Census, ... 313–315
Contents of the four volumes, ... 153
Volume I. — Population and Social Statistics, ... xxii–xxvi
Volume II. — Occupations and Defective and Delinquent Classes, . . xxii, xxiii
Volume III. — Manufactures and Trade, ... xxiii
Volume IV. — Agriculture, The Fisheries, and Commerce, . . . xxiv, xxv
Conclusion, ... xxvi, xxvii

ANALYSIS.

A. General Population Comparisons, ... xxvii–xxx
B. Population Classified by Urban and Rural Conditions, . . . xxviii–xxxv
C. Population Classified by Sex, ... xxxv–xxxviii
D. Population Classified by Native and Foreign Born, ... xxxviii–xlix
E. Population Classified by Color and Race, ... xlix–liii
F. Population Classified by Conjugal Condition, ... liii–lvi
G. Population Classified by Families. — Size, Number, and Kind of Habitation, ... lvii–lxii
H. Population Classified by Relationship to Head of Family, . . . lxii–lxv
I. Population Classified by State of Birth of Native Born, . . . lxvi–lxxiii
J. Population Classified by Country of Birth of Foreign Born, . . lxxiv–lxxxiv
K. Population Classified by Foreign Parentage, ... lxxxiv–civ
L. Population Classified by Ages, ... civ–cxi
M. Population Classified by Political Condition, ... cxi–cxv
N. Population Classified by Illiteracy, ... cxv–cxvii
O. Population Classified by Military Service, ... cxvii, cxviii
P. Other Presentations, ... cxviii

POPULATION AND SOCIAL STATISTICS.

[A presentation which shows, for each city and town in the Commonwealth, the statistics of population, sex, native born and foreign born, color and race, conjugal condition, number of families and average size, relation to head of family, place of birth of native-born and foreign-born persons, length of residence in Massachusetts of foreign-born persons, parent nativity, grandparent nativity, political condition, illiteracy, occupations, and veterans and militia. The arrangement is alphabetical by counties. Recapitulations are given for counties and the State.]

THE

DECENNIAL CENSUS OF THE COMMONWEALTH.

1905.

GENERAL INTRODUCTION.

Besides the decennial censuses taken by the national government since 1790, enumerations under the auspices of the Commonwealth have been taken in Massachusetts at various times. There were colonial censuses in 1754, 1765, and 1776, and state censuses in connection with the gathering of industrial statistics were ordered in 1837, 1845, and 1855. The first regular decennial enumeration of the inhabitants was in 1855. The present is, therefore, the eighth census of industrial statistics conducted by the Commonwealth, and the sixth constitutional decennial enumeration of the people.

These volumes give, for the Commonwealth, the most important data concerning its people (including certain facts relative to the defective and delinquent classes), manufactures, trade, agriculture, the fisheries, commerce, schools, and libraries. Every part of the work has been compressed to the last degree compatible with the different showings, while the more salient features have not been omitted.

Complaint is often made regarding the delay usually incident to the publication of the results of a census, the reasons for which are not ordinarily understood by the general public. To count the population and announce the results may seem a simple matter; but it must be borne in mind that censuses form an historical record for all time, and that it is, therefore, imperative that the greatest care and intelligence be exercised in the gathering of the facts to be dealt with and in the work of tabulation and presentation. In all work of this nature, these considerations are vital and fundamental, and time and even cost are of secondary importance, since if these be sacrificed to mere speed the whole work may be rendered valueless and therefore a complete waste of public money. Certain circumstances have, however, operated to delay this publication longer than would probably have been the case otherwise, namely: the adoption of

methods of computation which were in the nature of an experiment and materially retarded the work of the clerks engaged upon the tabulations; also the adoption of a scheme of presentation which, being an innovation in census work, necessitated, after the first series of tabulations had been completed, a considerable amount of retabulation in order to procure results that would be comparable and enable the furnishing of information most frequently in demand by the public. The innovation referred to consisted of a plan devised by Mr. Charles F. Pidgin, who was Chief of the Bureau at the outset of the work, for bringing all the data for population and manufactures embraced in Volumes I and III together under each city and town head, somewhat after the style of a gazetteer. In affording to citizens interested primarily in the census facts pertaining to their own particular locality a ready means of reference thereto, this plan admirably served its purpose; but it was a departure from established and approved methods of census presentation and affects the facility with which the statistics may be compared with those of preceding censuses. It is, therefore, a fair question whether the loss in this respect is sufficiently offset by the convenience afforded an occasional individual who may appreciate finding a comprehensive, though unrelated, mass of data under each separate town heading.

The Census of 1905, as originally planned, contemplated the publication of its results in three volumes and the elimination therefrom of a considerable amount of data gathered at great expense by the enumerators, it being proposed, however, to publish some portions of this in "The Labor Bulletin," a serial publication of the Bureau. But it seemed to me, upon assuming the office of Chief of the Bureau in July, 1907, that these data, relating chiefly to the occupations of the people, were of sufficient social importance to warrant their tabulation and publication at least in summary form, and in a permanent volume that should be a part of the census series, rather than to scatter them disconnectedly through numerous issues of a pamphlet periodical, a method of publication certain to deprive them of much of their value for reference purposes by students of economic and social questions, who are the chief users of such data. This view was supported by an earnest body of social workers, economists, statisticians, and others. The Legislature of 1908, to which these considerations were presented, approved the suggestion and granted the additional appropriation required. The original plan of publication was accordingly revised so as to provide for the publication of this census in four volumes, Volumes I and II to be devoted to Population and Social Statistics; Volume III, to Manufactures and Trade; and Volume IV, to Agriculture, The Fisheries, and Commerce. The scope of these volumes is outlined in this introduction and for Volume I may be found on pages xxii and xxiii.

It is proper to insert at this point, as a matter of record, the text of the act providing for the taking of the Census of 1905, and then to describe the methods adopted in carrying out the same, and to give, including a statement of the cost, certain facts that may be of general interest in connection with the prosecution to completion of a work of this magnitude.

The Census Law of 1905.

[Chap. 423, Acts of 1904.]

An Act to provide for taking the Decennial Census of the Commonwealth.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

Section 1. The decennial census of the Commonwealth, required by articles twenty-one and twenty-two of the amendments to the constitution, and the decennial census of the industries of the Commonwealth, shall be taken in the year nineteen hundred and five and in every tenth year thereafter, under the direction of the bureau of statistics of labor, as hereinafter provided.

Section 2. The information sought by the census shall relate to population and social statistics, manufactures, trade, mining and quarrying, agricultural products and property, the fisheries, commerce, libraries, and to schools and school property. This information shall be gathered upon schedules devised by the bureau of statistics of labor and containing inquiries framed by the bureau. The schedules shall be submitted to the governor and council for their approval, and shall contain no other inquiries than those so approved.

Section 3. Before preparing the schedules, the chief of the bureau of statistics of labor shall communicate with the heads of the different state departments, offices and institutions, and invite suggestions from them as to the insertion of inquiries in the schedules, the answers to which will supply information of value; and it shall be the duty of the persons so addressed to communicate to the chief of the bureau within sixty days such inquiries as they may desire to have incorporated in the schedules; and if the same are approved by the governor and council they shall form part of the schedules. The chief shall also request similar suggestions from the mayors of cities and the selectmen of towns, and the inquiries suggested by them within sixty days shall form part of the schedules, if approved as hereinbefore provided.

Section 4. The information to be gathered as to population and social statistics shall include an enumeration of the inhabitants and a special enumeration of the legal voters residing in each city and town and in each ward in each city in the Commonwealth on the first day of May in the census year. The information as to libraries, schools and school property shall relate to facts for the year ending on the thirtieth day of June in said year, and, so far as property is concerned, as it exists on the said thirtieth day of June. The information as to agricultural products and property shall relate to facts for the year ending on the fifteenth day of November in said year, and, so far as property is concerned, as it exists on the said fifteenth day of November. The information as to manufactures, trade and commerce shall relate to the facts for the year ending on the thirty-first day of December in said year, or for the last financial year of the establishment or firm making a return; and from the information thus collected shall be compiled the report on the annual statistics of manufactures for the census year.

Section 5. The government of the United States having provided that the

United States census office may co-operate with the statistical bureaus in the several states, the United States census office to bear the expense of the field work in gathering statistics of manufactures, the chief of the bureau of statistics of labor is hereby authorized to contract with the director of the United States census for the rendering of such service, the contract to be subject to the approval of the governor and council. In case the gathering of the statistics of manufactures by the United States should cover the calendar year nineteen hundred and four instead of the year nineteen hundred and five, as hereinbefore provided, the statistics of manufactures shall be taken as for the time provided in the contract made with the director of the census.

Section 6. In case the contract is made with the director of the census for the collection of statistics of manufactures, the chief of the bureau of statistics of labor is hereby authorized to accept the appointment of special agent in charge for this Commonwealth of the United States census of manufactures, and in the prosecution of his duties he may use the rooms of the bureau: *provided,* that the acceptance of such appointment shall not in any way interfere with the work of the bureau.

Section 7. For the purpose of obtaining the information called for by this act the chief of said bureau shall appoint census enumerators for each city and town in the Commonwealth, but the whole number of enumerators shall not exceed one for every three thousand persons in each city and town, according to the returns of the preceding decennial census, and shall be so many less as the chief may decide to be adequate for the duty: *provided,* that for the enumeration of the inhabitants and legal voters at least one person shall be appointed and compensated in each city and town; and *provided, further,* that every person appointed as an enumerator shall be an inhabitant of the city or town in which he is to perform the duty required, unless a properly qualified inhabitant cannot be found to undertake the work, in which case a non-resident may be appointed.

Section 8. The mayor and aldermen of cities and the selectmen of towns may nominate twice as many persons as there are enumerators to be appointed in each city and town, and of the persons thus nominated there shall be appointed as enumerators, under the provisions of this act, those found best qualified for the work, as determined by such rules and tests as the said chief may fix, subject to the approval of the civil service commissioners of the Commonwealth. In case the mayor and aldermen or selectmen do not nominate a sufficient number of persons thus found to be properly qualified, within thirty days after being requested to do so, then the said chief may appoint, subject to such tests as to qualifications as are herein provided for, the additional number required. In case any enumerator shall be found incompetent or derelict in the performance of his duty his commission may at any time be revoked by said chief and another enumerator appointed in his place.

Section 9. Beside the enumerators herein provided for, the said chief may appoint special agents for the purpose of securing statistics of the dependent, defective and delinquent classes, and for other services in connection with the census, under the limitations and regulations of law applicable to the employment of special agents of said bureau.

Section 10. The said bureau shall, on or before the first day of May in each census year, transmit to the enumerators appointed under the preceding section, printed schedules, in accordance with the provisions of section two, relating to the population and social statistics, with such instructions as said bureau may deem necessary, and a notice that the returns upon such schedules must be made to the office of said bureau on or before the last day of June of the same year.

Section 11. In making the returns designated in section ten the enumerators shall transmit therewith a complete list of all librarians and proprietors or principals of all incorporated and unincorporated colleges, academies and private schools; and upon such lists, and others prepared by the bureau, the information relative to manufactures, trade, mining and quarrying, the fisheries, commerce, libraries and schools and school property, shall be gathered by said bureau by mail, and of such persons as fail to make returns by mail, by such of the special agents appointed under section nine as the said bureau may designate.

Section 12. The information relative to agricultural products and property shall be gathered by such of the enumerators and special agents to be appointed under sections eight and nine as said bureau shall designate, but the number so designated shall not exceed two hundred and fifty for the whole Commonwealth; and they shall make return of such information on or before the fifteenth day of January following the census year.

Section 13. The enumerators and special agents appointed under this act, on receiving their commissions and before entering upon the discharge of their duties, shall take and subscribe an oath or affirmation that they will faithfully perform, to the best of their ability, the duties imposed upon them by their commissions, and that they will support the constitutions of the United States and the Commonwealth of Massachusetts, which oaths shall be filed in the office of said bureau by each enumerator or special agent, with his acceptance of his appointment; and in making his returns as to population and social statistics he shall sign and transmit therewith a certificate that the information reported in such returns is correct to the best of his knowledge and belief. All other schedules must be certified to in a similar manner by the persons making them.

Section 14. Upon the request of the mayor and aldermen of any city, made to the chief of said bureau before the first day of January next preceding the taking of the census, said chief shall direct the enumeration to be made in such manner as to show the number of inhabitants and legal voters in each street, square or avenue or in such blocks or sections of such city as may be agreed upon by the mayor and aldermen and the said chief, and the said chief shall report the results of such enumeration of the city to the clerk thereof. Upon receipt of the report the city may make a new division of its wards, as provided by law; and a description of the new ward boundaries with the population of the wards shall thereafter be filed by the city clerk in the offices of the secretary of the Commonwealth and the said bureau.

Section 15. The said bureau, after it has gathered the facts as to population, shall make an abstract showing the number of inhabitants and legal voters in each town and in each ward of the several cities, as determined by the enumeration, arranged by counties, and shall return the same into the office of the secretary of the Commonwealth on or before the first day of December of each census year, and the secretary shall submit the same to the general court within the first ten days of the session following the taking of the census of inhabitants.

Section 16. The said bureau, after it shall have gathered the facts called for in this act, shall cause to be prepared and printed reports of the same, with proper analyses, for the use of the general court, but in the reports so required or otherwise, no disclosure shall be made of the names of individuals, firms or corporations supplying the information called for by this act, such information being deemed confidential; and any enumerator or employee of said bureau violating this provision shall be fined as provided for in the succeeding section for wilful deceit and falsehood.

Section 17. If an enumerator or agent duly appointed under this act wilfully

refuses to perform any duty required of him in accordance herewith he shall forfeit a sum not exceeding five hundred dollars, and if he is guilty of wilful deceit or falsehood in the discharge of his duties he shall forfeit a sum not exceeding two thousand dollars or be imprisoned for not more than one year, and if any person shall refuse to give the information required by this act to a person authorized to collect the same he shall pay a fine not exceeding one thousand dollars for every such refusal.

Section 18. All fines imposed by this act may be recovered in any court of competent jurisdiction, by information or complaint of the attorney-general, and shall accrue wholly to the Commonwealth.

Section 19. The general results of the census shall be contained in three volumes: The first shall present statistics relating to population, schools and libraries; the second, statistics relating to agriculture, mines, pits and quarries, the fisheries and commerce; the third, statistics relating to manufactures and trade. It shall be the duty of the chief of the bureau to present the general information absolutely needed by the public in the most condensed and compact form, and to deliver all of the copy required for the three volumes to the state printers on or before the first day of September, nineteen hundred and six. The sociological and all other features of the census of value to the public shall be presented in the regular reports and bulletins of the bureau, or in such special reports as may be expressly authorized by the general court.

Section 20. There shall be allowed and paid out of the treasury of the Commonwealth to each enumerator employed under the provisions of this act, the sum of three dollars for each day of nine hours actually employed in said service, and to each special agent a sum not exceeding five dollars for every such day; and the account of each enumerator and special agent so employed shall be sworn to, and shall be paid on the approval of the chief of said bureau. Before payment to an enumerator the returns of such enumerator shall have been examined and found correct and properly made. No allowance shall be made to any enumerator for travelling expenses, except in extreme cases when such allowance would secure economy in the enumeration, and in no case shall any such allowance be made except upon previous written authority to incur such expenses, granted by the chief of said bureau.

Section 21. The chief of said bureau may expend a sum not exceeding fifteen thousand dollars in preliminary preparations for the census, in preparing and printing schedules, instructions, blanks and other like preparations, and in advising the public by the dissemination of proper information of the statistics to be gathered. He may, for the purpose of making abstracts and preparing reports on the census, employ such clerical assistants as he may require, under the limitations and regulations of law applicable to the employment of clerical assistance in said bureau, such clerical assistants to be paid from such appropriation as the general court may make for census purposes; but the rate of pay for such service shall not exceed the sum of five dollars for each day actually employed. From this sum there may be expended under the direction of the sergeant-at-arms a sum not exceeding one thousand dollars for the purpose of making repairs and putting in good order one of the houses owned by the Commonwealth for the use of said bureau during the taking of the census.

Section 22. In order that the work of enumeration, of tabulation, and of proof reading of the three census volumes may be prosecuted with the greatest speed and accuracy, the chief is hereby authorized to appoint not more than six persons, who shall be expert statisticians, at a salary not exceeding six dollars for each day actually employed: *provided*, that these appointments are made subject to the provisions of existing law governing such appointments.

Section 23. From the first day of July in the year nineteen hundred and four, until the thirtieth day of June in the year nineteen hundred and seven, these three years covering the periods of preparation, enumeration, tabulation and printing of the census volumes, the chief of said bureau and the first and second clerks thereof shall receive an extra compensation in addition to their salaries as now provided for by law, the sum of one thousand dollars to said chief, seven hundred dollars to said first clerk, and five hundred dollars to said second clerk, for each of the years named, such extra compensation to be paid from the appropriations for census purposes.

Section 24. The sergeant-at-arms is hereby authorized to place at the disposal of the chief of the bureau of statistics of labor any unoccupied rooms, building or buildings owned or leased by the Commonwealth, which may be suited for the work of the bureau, and to care for the same: *provided,* that, if no such rooms are available, the chief of the bureau shall secure such additional rooms as may be required by and adjudged suitable by him for the work on the census, the rent of such rooms and the care thereof to be paid out of the appropriations for the census.

Section 25. In order to make suitable preparation for the new census, the chief of the bureau is hereby authorized to destroy or sell all blank, written or printed material now in the possession of the bureau which has become useless, occupying room which can be used to advantage: *provided,* that all sums received from such sales shall be turned over to the treasurer of the Commonwealth.

Section 26. The bureau of statistics of labor is hereby authorized to expend the sum of three hundred and fifty thousand dollars as the maximum cost of the census of inhabitants and industries in the Commonwealth for the year nineteen hundred and five, exclusive of the cost of paper for schedules and of printing, stereotyping and binding the three volumes of the census hereinbefore provided for; and it shall not be lawful for said bureau to incur any expense or obligation whatever in respect to said census in excess of the sum herein provided.

Section 27. Chapter two hundred and twenty-four of the acts of the year eighteen hundred and ninety-four is hereby repealed.

Section 28. This act shall take effect upon its passage. [*Approved June 4, 1904.*]

The Enumeration.

In the Censuses of 1875 and 1885 it was provided that the appointment of enumerators should be subject to the approval of the mayor and aldermen in cities and of the selectmen in towns. Local interest in the results of the census is always very great, and, as a census can be no better than its enumerators, the provision cited was evidently intended to secure the co-operation of the local municipal officers in the selection of *competent* enumerators, in order that efficient service, satisfactory to those entrusted with the administration of the several city and town governments, might be obtained. In practice, however, it resulted in placing the selection of the enumerators largely in the hands of municipal officers. The co-operation of the local authorities in order that fit men might be obtained was certainly desirable, but it became necessary to guard against the selection of unfit persons who might be able to secure the approval of the municipal officers. The Chief of the Bureau at that time, the Hon. Carroll D. Wright, in referring to the appointment of enumerators in the report of the Census of 1885, suggested the possi-

bility of applying some form of civil service regulation in the selection of enumerators, and said:

> There should be some stringent provision of law to prevent selectmen of towns and mayors and aldermen of cities from recommending incompetent men for enumerators. By the law, the Bureau of Statistics of Labor must appoint men approved by the selectmen of towns and mayors and aldermen of cities. The accuracy and success of the enumeration depend largely upon the capacity and integrity of the body of enumerators. As a whole, the men selected for this work have been of good character and proper attainments, but in a few instances, . . . men were selected who proved unfit for any duty requiring care and integrity.

The general public service of the Commonwealth and of the cities has been under civil service regulations since 1885. The difficulty of obtaining a sufficient number of competent enumerators at the rate of pay fixed by the statute for a comparatively brief term of service, and under the necessary limitations of residence within the respective enumeration districts, made it impracticable to rely entirely on the usual civil service routine, applicable to clerical positions. Some method of testing the competency of applicants, however, was plainly required, and in 1895 it was thought proper that the civil service system of the Commonwealth should be recognized in connection with the appointments. At the same time it was necessary to retain the element of local co-operation on the part of the municipal officers. The Hon. Horace G. Wadlin, at that time Chief of the Bureau, therefore presented the following recommendations to the legislature, which, after due consideration, became part of the census law for 1895:

> For the purpose of securing the information called for by this act the chief of said bureau shall appoint census enumerators in each city and town in the Commonwealth, but the whole number of enumerators shall not exceed one for every two thousand persons in each city and town, according to the returns of the preceding decennial census, and shall be as many less as said chief may decide to be adequate for the duty: *provided,* that for the enumeration of the inhabitants and legal voters at least one person shall be appointed and compensated in each city and town; and *provided, further,* that each person appointed as an enumerator shall be an inhabitant of the city or town in which said person is to perform the duty required, unless a properly qualified inhabitant cannot be found to undertake the work, in which case a non-resident may be appointed.
>
> The mayor and aldermen of cities and the selectmen of towns may nominate twice as many persons as there are enumerators to be appointed in each city or town, and of the persons thus nominated there shall be appointed as enumerators, under the provisions of this act, those found the best qualified for the work, as determined by such rules and tests as the said chief may fix, subject to the approval of the civil service commissioners of the Commonwealth. In case the mayor and aldermen and selectmen do not nominate a sufficient number of persons thus found to be properly qualified, then the said chief may appoint, subject to such tests as to qualifications as are herein provided for, the additional number required. In case any enumerator shall be found incompetent or derelict

in the performance of his duty, his commission may at any time be revoked by said chief and another enumerator appointed in his place.

The paragraphs cited vested the power of appointing enumerators and their removal for cause wholly in the Chief of the Bureau, and instead of requiring the approval of the local officers *after* appointment, gave them the power of direct nomination before appointment of twice as many persons as were needed. From these the requisite number were to be selected strictly in order of merit, in accordance with a test approved by the Civil Service Commissioners; and, in case a sufficient number of fit persons were not nominated by the local officers, provision was made for securing other persons to perform the work. In other words, all applicants were subjected to competitive test; ample opportunity was given to the municipal authorities to make recommendations of applicants subject to such a test; and the Chief of the Bureau was not required to take incompetent persons, so far as the fact of competency could be determined by the method devised.

The selection of enumerators in 1895 proceeded in accordance with the provision of the law cited. The test of capacity, which was duly approved by the Civil Service Commission, was practical rather than technical, requiring no extraordinary ability or literary training on the part of the applicant, but nevertheless being adapted to the purpose of determining the fitness of the nominees for the especial service demanded. Each applicant or nominee was provided with a copy of the instructions, sent to him two weeks before he was required to meet the examiners, in order that he might prepare himself for the test of fitness. On the day appointed for the examination, the State having been divided into examination districts, the applicants were given certain hypothetical facts relating to a family in the form of a narrative, which facts they were required, under the personal oversight of an office inspector, to enter upon schedules similar to the ones to be used in the census work, — in accordance with the instructions which they had previously received. Besides this, each applicant was required to state in writing his previous business experience, his habits with respect to the use of intoxicating liquors, whether he had ever been convicted of any offense against the law, his age, and certain other personal facts which tended to indicate his fitness for the work. The papers were numbered and marked on a percentage basis by the examining force, who had no knowledge of the names of the applicants, and the appointments were made in order of merit, observing the conditions as to residence fixed by the statute, beginning at the top of the list and proceeding downward until a sufficient number was secured. No considerations other than those shown upon the applicants' papers affected appointments, except that, other things being equal, veteran soldiers were given preference in accordance with the spirit of the civil service law of the Commonwealth. This method of selection was novel

in its application to the appointment of census enumerators, and, so far as known, was the first attempt to apply a standard of fitness determined by competitive test. It entirely justified itself by the results, and not the least of its benefits was the fact that every enumerator who was appointed had been led to study the instructions under which his work would be performed some four weeks before entering upon service, and in the examination he had the important points of the schedule brought forcibly to his mind, so that he was in a measure prepared when he entered upon the field of work.

It is to be regretted that when the preparations were made for taking the Census of 1905 the plan of appointment and examination adopted ten years before, which proved so satisfactory, was not more closely adhered to.

The candidates for appointment as census enumerators in 1905 were not given a set of instructions to study and then subjected to an examination under the supervision of officers of the Bureau, nor were the latter made acquainted with the personal appearance of candidates through examiners, both of which tests had been applied in the Census of 1895. Instead, sample schedules were mailed to the candidates at their homes and were not filled out in the presence of an inspector appointed by the office, no effort thus being made to see that the candidate had no assistance in filling out this sample schedule. It is very evident that some of the conditions complained of by Dr. Wright in 1885 were duplicated in this census and that a higher standard of efficiency was secured by the plan followed in 1895.

In the Census of 1905 the State was divided into 1,181 enumeration districts,[1] approximately one district for each 3,000 inhabitants, except in towns of less than 3,000 population, in which case the law provided that there should be one enumerator for each town. There were also 103 special districts, consisting of public and private institutions (and including the 11 islands and forts in Boston harbor), which were enumerated in most cases by officials connected with the institutions, acting as census agents. There were 34 inspectors and one agent who was assigned to special work. One district enumerated as one district by one enumerator was tabulated as two, so as to show the population of the new town of Plainville separate from that of Wrentham. Owing to slow enumeration, illness, incapacity on the part of the appointee, or other causes, a large number of the original districts were subdivided into two and sometimes three parts, making 162 extra districts, or a grand total of 1,446 enumeration districts.

In accordance with the law, the mayors of cities and the selectmen of towns were communicated with, informed as to the total number of

[1] One district was re-enumerated, and the work was done by nine enumerators. This has been counted as one district in the figure given for "regular" enumeration districts, 1,181. It was begun August 15 and finished August 19.

enumerators to be appointed in their respective municipalities, with the request that they nominate twice as many persons as were required. The officials complied with the request within the 30 days allotted them for making the return. Of the total list of nominees, 637, in the interim between the mail examination and the time for beginning work (May 1), declined to serve, mainly owing to the fact that they had secured permanent employment elsewhere. These declinations, and the fact that many failed to pass the examination and that 34 were subsequently selected to act as inspectors, made it imperative to request further nominations to fill vacancies. The total number of persons ultimately examined was 3,093, some 2,000 of whom applied directly to the Bureau by letter or in person, and were referred to the officials of their respective cities or towns. Of the entire number finally accepted, 214 were women.

All of the schedules and other equipment were shipped to the enumerators before the first day of May, 1905, and the first completed population returns were received on May 10. A few days later the work of examining the schedules was begun in order to prepare them for the process of detailed tabulation and to verify the statements made on the enumerators' daily work reports, so as to expedite the passing forward of their accounts for settlement. The returns from the last enumeration district were received in the office on August 16, and the first announcement of the population was made in the public press on August 31, 1905, the required statement of population and legal voters in printed bulletin form being transmitted to the Secretary of the Commonwealth on December 1, following.

Tabulation and Publication.

The clerical force engaged in the tabulation of the census was selected in accordance with the regulations of the Civil Service Commission, and no doubt a more competent staff was secured in this manner than would otherwise have been probable. It is, therefore, a somewhat disappointing admission to be compelled to make that, out of 240 clerks employed at different times on the Census of 1905, not more than a dozen of the whole number exhibited efficiency of a sufficiently high order to warrant their being given positions of responsibility, the duties of which involved the supervision and verification of the work of others. These clerks were all women ranging in age from 18 to 48, and they had doubtless sometime in their lives been taught the simple forms of mathematics in the public schools; but if to add a column of figures correctly, not to say rapidly, and to sort and count, for example, 100 cards so that the several subdivisions would add to 100, or to copy a page of simple and legible manuscript with accuracy were comprised in the curriculum of their education, there was, in many instances, but slight evidence of it in their census work. But inefficiency on the part of the ordinary clerical force,

which had to be tolerated, was not, of course, permitted to affect the ultimate result with respect to its completeness and accuracy, since the Bureau fortunately had as members of its staff a number of trained men and women, who, having served through one or more censuses, had become experts in this class of work and who were entirely competent, faithful, and accurate to the last degree in the thoroughness with which they supervised the work of the temporary employees, and with persistent perseverance searched for possible errors, detected and corrected them. This is expert, technical work of the highest order. Considering its quality and the faithfulness and intelligence with which it was performed, the remuneration paid was modest, and those who performed it must needs accept as part recompense the satisfaction of having rendered well a loyal service to the Commonwealth.

The general working force in the office and in the field was under the supervision and immediate personal direction, under the Chief of the Bureau, of Mr. Frank H. Drown, Chief Clerk, whose duties called for the display of executive ability of a high order. The other responsible heads of divisions or particular branches of supervisory work above referred to were as follows:

POPULATION.

Clerks.	Character of Work.
William G. Grundy, Second Clerk,	In charge of enumerators and enumeration.
Annie L. Flynn,	In charge of tabulation.
Everett W. Johnson,	In charge of supplies and shipment and receipt of enumerators' work.

MANUFACTURES.

Margaret Shea,	In charge of field agents, tabulation, and preparation of copy, including verification and proof-reading.

TRADE.

Charles C. L. Moore,	In charge of field work.
Lena B. Baldwin,	In charge of tabulation and preparation of copy, including verification and proof-reading.

AGRICULTURE.

Charles C. L. Moore,	In charge of field work.
Lena B. Baldwin,	In charge of tabulation and preparation of copy, including verification and proof-reading.

THE FISHERIES AND COMMERCE.

Charles Thompson,	In charge of field work.
A. Louise Foster,	In charge of tabulation and preparation of copy, including verification and proof-reading.

DEFECTIVE AND DELINQUENT CLASSES.

Margaret Shea,	In charge of tabulation and preparation of copy, including verification and proof-reading.
Herbert B. Lang, M.D.,	In charge of the analysis of the deaf and dumb, and acute and chronic diseases.

DIVISION OF RESULTS.

Hannah M. Varney,	In charge of aggregation of results, preparation of copy for population volume, verification, and proof-reading.

Cost of the Census.

The cost of the Census of 1905 was $452,000 as against an expenditure of $321,617.40 for the completion of the Census of 1895. This was an increase of 40.54 per cent in the total cost, while the population increased during the same decade 20.14 per cent. Computing the cost on the basis of per capita expense, the Census of 1895 cost $0.13 and the Census of 1905, $0.15. The figures of total cost in both instances represent the aggregate amount of all appropriations made for census purposes for both periods, excepting the cost of printing the census volumes, for which no comparison can be made at this writing. The expenditures of the two censuses have been classified on a basis intended to make them as nearly comparable as possible, with the following result:

Classification.	Amounts		Percentages	
	1895	1905	1895	1905
Summary of Expenditures.	$321,617.40	$452,000.00	100.00	100.00
I. Cost of supervision and tabulation,	143,780.71	178,282.70	44.70	39.44
II. Cost of physical equipment and operation,	36,105.61	37,144.23	11.23	8.22
III. Cost of field work,	141,731.08	236,573.07	44.07	52.34
Per capita expense,	$0.13	$0.15		
Details.				
I. *Supervision and tabulation:*				
1. Chief, chief clerk, and second clerk,	$6,600.00	$6,600.00	2.05	1.46
2. Office clerks,	98,151.83	108,837.65	30.52	24.08
3. Inspectors, population,	1,363.15	15,893.82	0.42	3.51
4. Inspectors, agriculture,	8,187.77	7,199.94	2.55	1.59
5. Supervisory staff, not included in foregoing,	24,835.59	26,071.00	7.72	5.77
6. Messengers and laborers,	4,642.37	13,680.29	1.44	3.03
Total cost of supervision,	$143,780.71	$178,282.70	44.70	39.44
II. *Physical equipment and operation:*				
1. Office supplies of all kinds (including "chip" cases, sorters, adding machines, typewriters, etc.),	$9,031.40	$9,584.54	2.81	2.12
2. Carpenter work, furniture, and repairs,	847.78	4,081.94	0.26	0.90
3. Lighting, heating, etc.,	1,960.56	2,266.75	0.61	0.50
4. Postage and express,	7,946.56	3,019.63	2.47	0.67
5. Telephone charges,	97.35	311.81	0.03	0.07
6. Job printing,	13,153.78	15,005.44	4.09	3.32
7. Sundries,	348.18	687.81	0.11	0.15
8. Mileage,	2,720.00	2,186.31	0.85	0.49
Total equipment and operating expenses, exclusive of salaries and personal expenses,	$36,105.61	$37,144.23	11.23	8.22
III. *Field work:*				
1. Services and expenses of population enumerators,	$98,947.25	$159,653.06	30.77	35.32
2. Services and expenses of agriculture enumerators,	22,990.03	44,762.77	7.15	9.90
3. Services and expenses of manufactures enumerators,	19,793.80	8,568.47	6.15	1.90
4. Services and expenses of fisheries and commerce enumerators,	–	8,074.50	–	1.79
5. Services and expenses of trade enumerators,	–	15,514.27	–	3.43
Total cost of field work,	$141,731.08	$236,573.07	44.07	52.34

Population and Social Statistics.

I. Population and Social Statistics.

The first presentation covers the facts concerning each city and town in the State, arranged alphabetically by counties, as follows: Barnstable, Berkshire, Bristol, Dukes, Essex, Franklin, Hampden, Hampshire, Middlesex, Nantucket, Norfolk, Plymouth, Suffolk, and Worcester. Recapitulations by counties and for the State follow the presentation for cities and towns. Under each county the cities and towns are arranged alphabetically and for each of these civil divisions the statistics of population, sex, native and foreign born, color and race, conjugal condition, number of families and average size, relation to the head of family, place of birth of native born and foreign born, length of residence in Massachusetts of foreign-born persons, parent nativity, grandparent nativity, political condition, illiteracy, classes of occupations, and veterans and militia are given. It will be noticed that, by this manner of arrangement, reference to a particular city or town will supply all the desired information under the headings cited.

II. Ages.

1. Under one to 80 years and over for towns, cities, counties, and the State.
2. Under one to 80 years and over for the cities and the State by native and foreign born.
3. Under one year in detail by months for towns, cities, counties, and the State.
4. 80 years and over in detail for towns, cities, counties, and the State, with a recapitulation for counties and the State by native and foreign born.

III. Population and Legal Voters.

For towns, cities (wards and precincts), counties, and the State.

IV. Population.

1. By cities and towns, alphabetically arranged.
2. Rank of cities and towns.
3. Comparison for 1895 and 1905. Increase and decrease by cities and towns.

V. Population and Sex.

1. For towns, cities, counties, and the State, with percentages.
2. Comparison for 1895 and 1905. Increase and decrease by sex.

VI. Native and Foreign Born.

For towns, cities, counties, and the State, by sex, with percentages.

VII. Color and Race.

For towns, cities, counties, and the State, by sex, with percentages.

VIII. Conjugal Condition.

For towns, cities, counties, and the State, by sex, with percentages.

IX. Villages: by Towns.

X. Precincts and Parishes: by Towns.

XI. Number and Size of Families.

1. The State.
2. Cities and wards, alphabetically arranged.

XII. Kind of Habitation.
1. The State and counties.
2. Cities and wards.

XIII. Censuses of Population: 1765–1905.
For cities and towns, alphabetically arranged.

XIV. Public and Private Schools.
For towns, cities, counties, and the State.

XV. Libraries and Reading Rooms.
For towns, cities, counties, and the State.

VOLUME II.

Occupations and Defective and Delinquent Classes.

I. Occupations for the City of Boston.
Distributed by classes and sections of occupations, showing the aggregate number, native and foreign born, parent nativity, grandparent nativity, color and race, conjugal condition, age periods, degree of illiteracy, and place of birth of father in detail.

II. Occupations for the State.
Arranged as in Section I, with the addition of the detail of occupations.

III. Occupations of Mothers and Married Women for the City of Boston.
Showing the number of mothers having no children, number having children, and the number of married women who have had children, arranged in the same manner as in Section I.

IV. Occupations of Mothers and Married Women for the State.
Arranged in the same manner as in Section III, with the detail of occupations.

V. Defective Social and Physical Condition.
1. Defective social and physical condition by towns: on the basis of persons.
A. For each of the cities and towns of the State, the number of defective persons, males and females, are classified under the following 14 conditions: Acute diseases, blind, chronic diseases, consumptive, deaf, deaf and dumb, dumb, deformed, epileptic, feeble-minded, insane, lame, maimed, and other defective physical conditions.
B. The socially defective are classified under the following four classes: Paupers, prisoners, juvenile offenders, and neglected children.
2. Defective social and physical condition: on the basis of conditions.
The data for the 18 defective conditions include age periods, length of residence in the United States, political condition(where applicable), illiteracy, native and foreign born and descent, color and race, and conjugal condition.
The conditions are: Acute diseases, blind, chronic diseases, consumptive, deaf, deaf and dumb, dumb, deformed, epileptic, feeble-minded, insane, lame, maimed, and other defective physical conditions.

VOLUME III.

Manufactures and Trade.

A. Manufactures.

I. Manufactures: by Towns.

1. Under each city and town which contains three or more establishments engaged in manufacturing, data are shown covering the number of establishments, private firms and corporations, partners and stockholders, amount of capital invested, value of stock and materials used, value of goods made, the average number of wage-earners and amount of wages paid, the number of salaried persons and amount of salaries paid, the average proportion of business done, and the average number of days in operation.

2. Comparisons for counties and the State: 1895 and 1905.

   a. Establishments and capital.
   b. Value of stock used.
   c. Value of goods made.
   d. Average number of persons employed.
   e. Wages paid.
   f. Average yearly earnings.
   g. Number of salaried persons.
   h. Salaries paid.
   i. Average yearly salaries.

3. Comparisons for cities and the State: 1895 and 1905.

   a. Establishments and capital.
   b. Value of stock used.
   c. Value of goods made.
   d. Average number of persons employed.
   e. Wages paid.
   f. Average yearly earnings.
   g. Number of salaried persons.
   h. Salaries paid.
   i. Average yearly salaries.

II. Manufactures: by Industries.

1. Like the showing for towns, data are given under each industry covering the number of establishments, private firms and corporations, partners and stockholders, amount of capital invested, value of stock and materials used, value of goods made, the average number of wage-earners and amount of wages paid, the number of salaried persons and amount of salaries paid, the average proportion of business done, and the average number of days in operation.

2. Comparisons by industries: 1895 and 1905.

   a. Establishments and capital.
   b. Value of stock used.
   c. Value of goods made.
   d. Average number of persons employed.
   e. Wages paid.
   f. Average yearly earnings.
   g. Number of salaried persons.
   h. Salaries paid.
   i. Average yearly salaries.

III. General Statistics by Industries for the Cities and the State.

A. Manufactures — Con.

IV. Goods Made: by Industries. In cities and in towns, with percentages.

V. General Statistics of Manufactures for Selected Industries.

1. Boots and shoes (factory product).
2. Carriages and wagons.
3. Clothing.
4. Cotton goods (woven goods and yarn).
5. Food preparations.
6. Furniture.
7. Hosiery and knit goods.
8. Jewelry.
9. Leather.
10. Liquors (malt).
11. Machines and machinery.
12. Metals and metallic goods.
13. Musical instruments and materials.
14. Paper.
15. Printing, publishing, and bookbinding.
16. Print works, dye works, and bleacheries.
17. Rubber and elastic goods.
18. Woolen goods (woven goods and yarn).
19. Worsted goods.

VI. General Statistics of Manufactures for Cities and Towns Arranged Alphabetically.

VII. Motive Power: by Towns.

VIII. Motive Power: by Industries.

B. Trade.

I. Trade: by Towns.

1. Date of establishment for the State.
2. Number of establishments, partners and stockholders, amount of capital invested, and value of goods sold.
3. Persons employed, wages and salaries, and average earnings.
4. Classified weekly wages for cities.
5. Classified weekly salaries for cities.
6. Manner of selling goods: by counties.
7. General statistics of trade for cities.

II. Trade: by Kinds of Business.

1. Number of establishments, partners and stockholders, amount of capital invested, and value of goods sold.
2. Persons employed, wages and salaries, and average earnings.
3. Classified weekly wages.
4. Classified weekly salaries.
5. Manner of selling goods.
6. General statistics of trade by kinds of business for cities.
7. General statistics of trade for selected trades.
8. Kinds of business in detail for cities.

VOLUME IV.

Agriculture, The Fisheries, and Commerce.

A. Agriculture.

I. Agricultural Products and Property: by Cities and Towns.

II. Agricultural Products: by Name.

1. Dairy products.
2. Poultry products.
3. Animal products.
4. Cereals.
5. Fruits, berries, and nuts.
6. Vegetables.
7. Other products.
8. Products from mines, quarries, pits, etc.

III. Agricultural Property: by Name.

1. Land.
2. Buildings on farms.
3. Domestic animals, etc.
4. Fruit trees and vines.
5. Mines, quarries, pits, etc.

IV. Classification of Farm Land; Values of Product and Property; Acreage, etc.: by Cities and Towns.

B. The Fisheries.

I. Sea and Shore Fisheries.

Investments, products, food-fish preparations, persons engaged in the fisheries: for towns, cities, and counties, with recapitulations.

II. Food-fish: by Name.

1. Bluefish.
2. Clams.
3. Cod.
4. Cusk.
5. Flounders.
6. Haddock.
7. Hake.
8. Halibut.
9. Herring.
10. Lobsters.
11. Mackerel.
12. Oysters.
13. Pollock.
14. Scollops.
15. Squeteague.
16. Swordfish.

III. Registered Vessels (5 tons or over).

IV. Inland Fisheries.

Investments, products, etc., for towns, cities, and counties, with recapitulations.

V. Aggregates: Sea and Shore and Inland Fisheries.

Investments and products.

C. Commerce.
  I. Ocean and Coastwise Commerce.
    1. Vessels, tonnage, and value.
    2. Freight, passengers, and amount received.
    3. Investments and earnings, with recapitulations.
    4. Ownership of vessels.
    5. Partners and stockholders.

The analysis of the population statistics of Volume I, immediately following this Introduction, was prepared by Mr. Frank H. Drown, Chief Clerk of the Bureau, and embraces tables showing comparisons with former censuses and numerous correlations with data gathered from United States statistical publications. This has involved a very considerable amount of industrious research and study, and the competent manner in which it has been done is entitled to frank recognition and credit.

By the terms of Chapter 371 of the Acts of 1909, approved by His Excellency the Governor May 10, 1909, the title of the department charged with the duty of taking the Decennial Census of the Commonwealth was changed from the Bureau of Statistics of Labor to the Bureau of Statistics, in recognition of the fact that the former name was not accurately comprehensive of the broad scope of the Bureau's statistical activities, as determined by the legislature. Inasmuch, however, as practically all of the work upon the four volumes of the Census of 1905 had been completed before the act referred to was passed, the Manufactures Volume having already been published, and, moreover, since the work has necessarily, in most respects, been carried to completion in accordance with the plans originally devised by my predecessor, Mr. Charles F. Pidgin (who was Chief of the Bureau of Statistics of Labor from January 31, 1903, to July 8, 1907), it has not seemed necessary to recognize the change in the name of the Bureau on the title pages of these volumes.

CHARLES F. GETTEMY,

Director, Bureau of Statistics.

State House, Boston, September 15, 1909.

ANALYSIS.

A. General Population Comparisons.

The Commonwealth of Massachusetts covers part of the territory originally granted to the Plymouth Company of England. It grew out of the consolidation of the colonies of Plymouth and Massachusetts Bay. The settlement at Plymouth began with the landing of the Pilgrims, December 22, 1620; the colony of Massachusetts Bay was established under John Endecott at Salem in 1628. In 1692 the colonies of Massachusetts Bay and Plymouth were consolidated as a Royal Province, including also the District of Maine. The territory now comprising the State of Maine was set off from Massachusetts by an Act of Congress passed March 3, 1820, admitting Maine as a State into the Union on March 15, 1820.

The table given below exhibits the population of Massachusetts at each census from 1790 to 1905, by decennial periods up to and including 1850, after which date Massachusetts took a census midway between each federal decennial period, so that from 1855 to 1905, both dates inclusive, the figures show the population of the Commonwealth for each five years. In the absence of a complete and authentic survey, the total land surface has been considered as 8,040 square miles, and the density of population in the following table has been figured on this basis. This table also shows the increase for each census year, the increase being expressed in numbers and percentages. The figures for the period 1790–1820 are based upon an elimination of the population of the State or District of Maine.

TABLE 1. *Population and Density, 1790–1905.*

CENSUS YEARS.	Density of Population (Based on Square Miles)	Total Population	INCREASE IN POPULATION	
			Numbers	Percentages
1790,	47.11	378,787	–	–
1800,	52.59	422,845	44,058	11.63
1810,	58.71	472,040	49,195	11.63
1820,	65.09	523,287	51,247	10.86
1830,	75.92	610,408	87,121	16.65
1840,	91.75	737,699	127,291	20.85
1850,	123.70	994,514	256,815	34.81
1855,	140.84	1,132,369	137,855	13.86
1860,	153.12	1,231,066	98,697	8.72
1865,	157.59	1,267,031	35,965	2.92
1870,	181.26	1,457,351	190,320	15.02
1875,	205.46	1,651,912	194,561	13.35
1880,	221.78	1,783,085	131,173	7.94
1885,	241.56	1,942,141	159,056	8.92
1890,	278.48	2,238,943	296,802	15.28
1895,	310.97	2,500,183	261,240	11.67
1900,	348.92	2,805,346	305,163	12.21
1905,	373.59	3,003,680	198,334	7.07

In 1790 there were slightly over 47 persons to a square mile of territory in Massachusetts, while in 1905 there were over 373 persons to a square mile. In 1800 the percentage of increase over the preceding 10 years

was 11.63 per cent. It rose to 34.81 per cent in 1850, this being the highest point it has reached in 115 years.

As determined by the State Census of 1895, the median point of population in Massachusetts was near the corner of River Street and Putnam Avenue, Cambridge. In 1905 this point was found to have moved southwest and is now at the corner of Commonwealth and Brighton Avenues in Brighton, Ward 25, of the city of Boston.

Table 2 gives a comparison for the cities and towns containing each a population of 8,000 or over in 1905 for the census years 1895 and 1905, and also shows the increase or decrease in numbers and percentages.

TABLE 2. *Comparison of the Population of Places of 8,000 Inhabitants and Over in 1905 for 1895 and 1905.*

CITIES AND TOWNS.	POPULATION		INCREASE (+), OR DECREASE (—), IN 1905 AS COMPARED WITH 1895	
	1905	1895	Numbers	Percentages
Cities.	2,024,325	1,647,732	+376,593	+22.86

TABLE 2. *Comparison of the Population of Places of 8,000 Inhabitants and Over in 1905 for 1895 and 1905* — Concluded.

CITIES AND TOWNS.	POPULATION		INCREASE (+), OR DECREASE (—), IN 1905 AS COMPARED WITH 1895	
	1905	1895	Numbers	Percentages
Towns — Con.				
Greenfield,	9,156	6,229	+2,927	+46.99
Danvers,	9,063	8,181	+882	+10.78
Amesbury,	8,840	9,986	—1,146	—11.48
Methuen,	8,676	5,690	+2,986	+52.48
Ware,	8,594	7,651	+943	+12.33
Winchester,	8,242	6,150	+2,092	+34.02
West Springfield,	8,101	6,125	+1,976	+32.26
Cities, and Towns of 8,000 and Over,	2,335,091	1,885,531	+449,560	+23.84
All Other Towns,	668,589	614,652	+53,937	+8.78
THE STATE,	3,003,680	2,500,183	+503,497	+20.14

Table 3 exhibits the increase or decrease in population by counties in 1905 as compared with 1895, also the density of population in these two censuses. In 1895 there were about 311 (310.97) persons to a square mile in the State, and in 1905 this had increased to over 373 (373.59) persons to a square mile. Suffolk County shows the largest increase in the number of persons per square mile in 1905 over 1895. The county showing the largest numerical increase in population is also Suffolk County. The county showing the largest percentage of increase in population is Hampden; namely, 28.17 per cent.

TABLE 3. *Comparison of the Population of Counties for 1895 and 1905.*

THE STATE AND COUNTIES.	Land Area (Square Miles)	DENSITY OF POPULATION		POPULATION		INCREASE (+), OR DECREASE (—), IN POPULATION in 1905 AS COMPARED WITH 1895	
		1905	1895	1905	1895	Numbers	Percentages

B. Population Classified by Urban and Rural Conditions.

In previous censuses it has been customary to analyze the percentages for the cities as distinct from the large towns; but it has been decided in the present publication to divide the population of the Commonwealth

into urban and rural, following the plan used in the Federal Census Office, which defines the urban population as "that element living in cities or other closely aggregated bodies of population, containing 8,000 inhabitants or more." In Massachusetts there is no difficulty in segregating the cities from the towns, owing to the fact that by the Constitution certain aggregations of people living in a specified town may be incorporated as a city, provided there are 12,000 or more inhabitants in the specified territory and that the act of incorporation be accepted by a majority of the people concerned. The table which follows gives the urban and rural population of Massachusetts on this basis:

TABLE 4. *Urban and Rural Population of the Commonwealth at Each Census Period, 1790–1905.*

CENSUS YEARS.	Total Population	Urban Population[1]	Number of Places	Percentage of Urban of Total Population	RURAL POPULATION	
					Total	Percentage of Total Population
1790,	378,787	18,320	1	4.84	360,467	95.16

[1] Population of places of 8,000 inhabitants or more at each census.

In 1790 the total population of Massachusetts was 378,787, at which time there was but one place which could be termed a city under this definition and this place was Boston, the population of which was 18,320, or 4.84 per cent of the total population. In 1905 the number of places containing 8,000 inhabitants or more had risen to 60, and the urban population was 2,335,091, or 77.74 per cent of the total population.

The proportion of urban population has enormously increased during the past 115 years, from 4.84 per cent to 77.74 per cent, or from about one-twentieth to over three-fourths of the total population; the proportion of rural population has, of course, correspondingly diminished. The towns of Massachusetts contain in most cases both urban and rural population in varying proportions, and unless one has a personal acquaintance with them one has no basis for obtaining the relative proportion of these elements in any town, except as indicated by the total population of the town. If the town is large, the presumption is that it contains a considerable urban population, while if it is small it is

probably all or nearly all rural. Measured arbitrarily by municipal units, in 1790 the rural population of the State was 360,467, or 95.16 per cent of the total population. In 115 years the number comprising the rural population had risen to 668,589, but the percentage had fallen to 22.26. In other words, while in 1790 over nine-tenths of the population lived in rural communities, in 1905 less than one-fourth of the population so resided.

While, as we have stated, the United States makes the dividing line between rural and urban population at places containing 8,000 and over inhabitants, Table 6, on page xxxiii, shows that if we make 5,000 the dividing line, 98 places, or 27.68 per cent of the number of cities and towns in Massachusetts, fall within such a group. These places contain 85.72 per cent of the population, and that they are also the industrially important municipalities of the Commonwealth is shown by the fact that they produced 92.12 per cent of the value of goods manufactured in 1905, the remaining 7.88 per cent of the product value of manufactures being distributed among 256 towns.

It has been shown that the urban population (on the basis of 8,000 inhabitants and over) of the State numbered at the present census 2,335,091 and constituted 77.74 per cent of the total population of the State. This leaves nearly one-fourth of the population to be accounted for, and it is clear that all of this remainder cannot be considered as representing strictly rural population. There are 27 towns which have been taken to represent the urban element, and there are 38 towns which may be said to comprise partly urban and partly rural population. In order, therefore, to reach a fair approximation of the proportion which the strictly rural population bore to the total population in 1905, it seems necessary to assign to an intermediate class this semi-urban element comprising in the aggregate 239,718 persons, and constituting 7.98 per cent of the total population. After subtracting, then, the urban and semi-urban population, the remainder may be assumed to represent very nearly the real rural population of the State, equivalent to 428,871, or 14.28 per cent. The following table shows the population classified into urban, semi-urban, and rural groups for 1905 and 1895, with percentages:

TABLE 5. *Population Classified into Urban, Semi-urban, and Rural Groups.*

[1] Adams shows a decrease because of the incorporation of the city of North Adams from a part of Adams.

The increase in population in the State from 1875 to 1905 was 81.83 per cent. It is noticeable that a great many of the cities and towns exceeded this percentage of increase. Boston has ranked as the first city every year since 1875, — in fact ever since 1790. Worcester has held the position of second city as regards population since 1885, ranking third in 1875. Fall River now occupies the third rank in size of cities, but in 1875 she was the fifth in rank. Cambridge ranks as the fourth city in size, rising from the fifth place in 1895, to which she had fallen since 1875, when she ranked fourth. New Bedford ranked tenth in 1875, but now holds the seventh position. Springfield ranked tenth in 1895, but rose to the eighth position in 1905, the position she held in 1875 and 1885. But the city which shows the most phenomenal growth in population is Everett. This growth has been almost entirely during the past 20 years. The total increase for the past 30 years has been 25,460, or 697.34 per cent. The nearest in rank, as regards percentage of increase, for 1905 over 1875, is the city of Brockton, which shows a gain of 351.82 per cent. The next in order of percentage of growth is the city of Melrose, rising from 3,990 in 1875 to 14,295 in 1905, an increase of 258.27 per cent. No city shows a loss since 1875.

The only town showing a decrease is the town of Adams, which shows a loss since 1875 of 3,274, or 20.77 per cent. This town ranked first among the towns in total population in 1875; fell to the tenth place in 1885, caused by the fact that the city of North Adams was set off from the town of Adams, and fell still further to the eighteenth position in

1895, but rose in 1905 to the ninth place as regards rank of towns. Attleborough ranked fourth in 1875, and rose to first place in 1885 but fell to the fourteenth position in 1895. This was caused by the setting off of the town of North Attleborough previously to the Census of 1895. She ranked seventh in position in 1905.

The cities which show a decrease in rank between the Censuses of 1895 and 1905 are as follows:

Lowell from 4th to 5th;
Somerville from 8th to 10th;
Salem from 12th to 15th;
Chelsea from 14th to 16th;
Waltham from 21st to 22d;
Gloucester from 17th to 23d;
Pittsfield from 23d to 24th;
North Adams from 24th to 25th;
Northampton from 26th to 27th;
Newburyport from 29th to 30th;
Marlborough from 28th to 33d.

C. Population Classified by Sex.

The total population on May 1, 1905, was 3,003,680. Of this number, 1,461,589 were males and 1,542,091 were females. Table 8 shows for the State, as a whole, the proportion which the number of each sex bears to the total population at each census from 1790 to 1905.

TABLE 8. *Proportion of the Sexes at Each Census Period, 1790–1905.*

Census Years.	Total Population	Males	Females	Percentages of Total Population

[1] Includes 5,463 "All other free persons" not separated by sex.
[2] Free white persons.
[3] Includes 6,452 "All other free persons except Indians not taxed" not separated by sex.
[4] Includes 6,737 "All other free persons except Indians not taxed" not separated by sex.
[5] Includes 128 "All other free persons except Indians not taxed" not separated by sex.

It is seen that females were in excess of males at every census from 1790 to 1905. But this is not a Massachusetts phenomenon as appears from the appended table giving the population by sexes in certain European countries; the figures given are the latest ones available at the time this article was written. When natural increase is not interfered with, either by immigration or emigration, wars or pestilence, the proportion of the sexes is nearly equal, females being slightly in excess of males.

TABLE 9. *Proportion of the Sexes in European Countries.*

COUNTRIES.	Total Population	Males	Females	PERCENTAGES OF TOTAL POPULATION	
				Males	Females
German Empire,	60,641,278	29,884,681	30,756,597	49.28	50.72
United Kingdom,	41,976,827	20,540,720	21,436,107	48.93	51.07
France,	38,450,788	18,916,889	19,533,899	49.20	50.80
Spain,	18,618,086	9,087,821	9,530,265	48.81	51.19
Belgium,	6,693,548	3,324,834	3,368,714	49.67	50.33
Netherlands, The	5,672,237	2,813,722	2,858,515	49.61	50.39
Portugal,	5,423,132	2,591,600	2,831,532	47.79	52.21
Sweden,	5,337,055	2,605,524	2,731,531	48.82	51.18
Denmark,	2,588,919	1,257,765	1,331,154	48.58	51.42
Norway,	2,240,032	1,087,603	1,152,429	48.55	51.45

In every one of these countries without exception females are in excess, the percentage of total population ranging from 50.33 to 52.21 per cent. In the United Kingdom, Denmark, German Empire, Portugal, Sweden, and Norway, one might be tempted to account for this fact by emigration, but in the cases of Belgium, France, The Netherlands, and Spain there is little emigration and the figures are practically those of undisturbed natural increase. Judging, therefore, from these cases, it would appear that the female sex outnumbers the male sex nearly in the proportion of 51 to 49. If the history of the distribution of the population by sexes from 1790 to 1905 is examined, it is seen that females have always been in excess of males, and the proportion 51 to 49 has been about the same. According to the United States Census of 1900, the proportion of males and females was 48.75 males and 51.25 females, which was almost the same proportion as for the Census of 1890, 48.58 males and 51.42 females.

Of the New England States, according to the Census of 1900, New Hampshire, Massachusetts, and Rhode Island exhibited a larger proportion of females than males, Massachusetts ranking first with 51.25 females against 49.46 for Maine; 50.10 for New Hampshire; 50.88 for Rhode Island; 49.99 for Connecticut; and 49.03 for Vermont.

In Table 10 is shown the increase in males and in females for each census period by numbers and percentages since 1790.

TABLE 10. *Increase in Males and Females at Each Census Period, 1790–1905.*

1885 over 1880,	74,444	8.67	84,612	9.15
1890 over 1885,	154,825	16.60	141,977	14.07
1895 over 1890,	126,992	11.68	134,248	11.66
1900 over 1895,	152,773	12.58	152,390	11.85
1905 over 1900,	94,115	6.88	104,219	7.25

Table 11 shows the number of females to each 100,000 males. The increase in number shown between 1860 and 1865 is undoubtedly due to the male mortality caused by the Civil War.

TABLE 11. *Number of Females to Each 100,000 Males, 1790–1905.*

Table 12 shows for places of 8,000 inhabitants and over in 1905 the number of males and females, together with the increase or decrease expressed in numbers and percentages for the census years 1895 and 1905. In the city of Boston, between 1895 and 1905, the number of males increased 50,643, or 21.13 per cent, while the females increased 47,817, or 18.59 per cent.

D. Population Classified by Native and Foreign Born.

The tabulations of the Census of 1905 exhibit a total population of 3,003,680, of which persons of foreign birth number 918,044 and those of native birth, 2,085,636. In the Federal Census of 1850 statistics were first obtained concerning the number of persons of foreign birth in Massachusetts. Table 13 shows the number of persons of native and foreign birth at each census year since and including that date, together with the proportions of native and foreign born of the total population.

TABLE 13. *Native and Foreign Born at Each Census Period, 1850–1905.*

CENSUS YEARS.	Total Population	Native Born	Foreign Born	PERCENTAGES OF TOTAL POPULATION	
				Native Born	Foreign Born
1850,	994,514	830,490	164,024	83.51	16.49
1855,	1,132,369	887,106	245,263	78.34	21.66
1860,	1,231,066	970,960	260,106	78.87	21.13
1865,	1,267,031	1,001,545	265,486	79.05	20.95
1870,	1,457,351	1,104,032	353,319	75.76	24.24
1875,	1,651,912	1,233,008	418,904	74.64	25.36
1880,	1,783,085	1,339,594	443,491	75.13	24.87
1885,	1,942,141	1,415,274	526,867	72.87	27.13
1890,	2,238,943	1,581,806	657,137	70.65	29.35
1895,	2,500,183	1,735,253	764,930	69.41	30.59
1900,	2,805,346	1,959,022	846,324	69.83	30.17
1905,	3,003,680	2,085,636	918,044	69.44	30.56

The proportion of foreign-born inhabitants, starting with slightly over 16 in every 100 in 1850, rose in five years to nearly 22 in every 100, or 21.66 per cent. It held to about this rate until 1870 when it increased to such an extent that nearly one-fourth of the total population of Massachusetts was foreign born. In 1885 this percentage had increased to 27.13 and in 1905 to 30.56 per cent.

For many years prior to 1820, immigration to the United States was but trifling in amount, and it numbered in the decade from 1820 to 1830 but 128,502 for the entire country. It was not until 1847 that the tide from foreign shores began to set in with great volume, and from that time to the present there has been a large migration across the Atlantic from every country in Europe, and latterly from Asia and Africa, until in 1905 the total number of immigrants numbered 1,026,499, or for the 10 years ending June 30, 1905, 5,396,761 persons. The following table shows the number of immigrant aliens whose declared destination was Massachusetts admitted to the United States from 1892 to 1905:

TABLE 14. *Immigrant Aliens Whose Destination was Massachusetts Admitted to the United States During the Fourteen Years Ending June 30, 1905.*

1898,	23,849		
1899,	30,754	TOTAL,	575,766

Table 15 shows the increase from one census period to another of the native born and the foreign born by numbers and percentages; that is to say, in 1855 over 1850 the native born increased 56,616, or 6.82 per cent, and the foreign born, 81,239, or 49.53 per cent; in 1905 over 1900

the native born increased 126,614, or 6.46 per cent, and the foreign born increased 71,720, or 8.47 per cent.

TABLE 15. *Increase in Native and Foreign Born at Each Census Period, 1850–1905.*

CENSUS YEARS.	NATIVE BORN		FOREIGN BORN	
	Numbers	Percentages	Numbers	Percentages
1855 over 1850,	56,616	6.82	81,239	49.53
1860 over 1855,	83,854	9.45	14,843	6.05
1865 over 1860,	30,585	3.15	5,380	2.07
1870 over 1865,	102,487	10.23	87,833	33.08
1875 over 1870,	128,976	11.68	65,585	18.56
1880 over 1875,	106,586	8.64	24,587	5.87
1885 over 1880,	75,680	5.65	83,376	18.80
1890 over 1885,	166,532	11.77	130,270	24.73
1895 over 1890,	153,447	9.70	107,793	16.40
1900 over 1895,	223,769	12.90	81,394	10.64
1905 over 1900,	126,614	6.46	71,720	8.47

Table 16 shows for cities and towns containing a population of 8,000 or over in 1905 the number of native and foreign born in each census year from 1875 to 1905, and in Table 17 equivalent facts are expressed in percentages.

TABLE 16. *Number of Native and Foreign Born in Places of 8,000 Inhabitants and Over in 1905 at Each Census Period, 1875–1905.*

The preceding tables indicate that the population of the cities and certain towns of the State, as regards native and foreign-born elements, has been much the same since 1875.

Table 18 shows the total population and native and foreign born classified by places of 8,000 inhabitants and over and places under 8,000. For instance, in the places of 8,000 inhabitants and over, there were 770,344 persons of foreign birth, or 83.91 per cent of the total number of persons of foreign birth, and in places containing less than 8,000 inhabitants there were 147,700 persons, or 16.09 per cent of the total number of foreign born.

TABLE 18. *Native and Foreign Born Grouped by Places Over and Under 8,000 Inhabitants, 1905.*

CLASSIFICATION.	Numbers	Percentages
Total Population,	3,003,680	100.00
Places of 8,000 and over,	2,335,091	77.74
Places under 8,000,	668,589	22.26
Total Native Born,	2,085,636	100.00
Places of 8,000 and over,	1,564,747	75.02
Places under 8,000,	520,889	24.98
Total Foreign Born,	918,044	100.00
Places of 8,000 and over,	770,344	83.91
Places under 8,000,	147,700	16.09

Table 19 shows a comparison of the native and foreign-born population for the census years 1895 and 1905 for cities and towns having a population of 8,000 or more in 1905, with percentages of total population and increase or decrease in numbers and percentages.

There were in Massachusetts as a whole 440 foreign-born persons to each 1,000 native-born persons in 1905 as against 432 in 1900 and 441 in 1895. The number of foreign born to each 1,000 native born in 1895 and 1905 was practically the same.

If the proportion of the foreign born in the 60 cities and towns is contrasted with the proportion of the foreign born in the remainder of the State, a very fair measure is obtained of their liking for urban life as compared with that of rural life. In 1905 there were 60 places

having a population of 8,000 or more which, taken collectively, represented a total population of 2,335,091; the total foreign-born element in these same 60 cities and towns numbered 770,344, or 32.99 per cent of the total population of these places. The foreign-born element in the State at large in 1905 constituted 30.56 per cent of the total population; the proportion in the 60 cities and towns being slightly larger (32.99). If we go a step farther and contrast the proportions of foreign born in the principal cities and towns with the remainder of the State outside of these 60 cities and towns, it is seen that the proportions are very nearly 33 to 22. The foreign-born element in the State, exclusive of that contained in the 60 principal cities and towns, constituted but 22.09 per cent of the total population of the State outside these places.

Putting the matter in another form, it appears that the foreign-born element in these 60 cities and towns constitutes 83.91 per cent of all the persons of foreign birth in the State, while in these same places the persons of native birth number 1,564,747, or only 75.02 per cent of the total number of persons of native birth in the State. It appears then from these figures that, taken as a whole, the element of foreign birth seeks the cities with greater avidity than does the element of native birth.

E. Population Classified by Color and Race.

The Census of 1905 shows that out of a total enumeration of 3,003,680 the persons designated as "white" numbered 2,966,762, and persons designated as "colored," meaning principally those persons of negro descent, numbered 34,041. In addition there were enumerated 2,224 Chinese, 100 Japanese, and 553 Indians. Table 21 gives the color and race of individuals as reported in the censuses from 1790 to 1905.

TABLE 21. *Color and Race at Each Census Period, 1790–1905.—Numbers.*

[1] Includes 128 "All other persons (except Indians not taxed)."
[2] This number includes the Indians in the State.

For the censuses from 1790 to 1850, inclusive, the population was classified as "white," "free negro," and "slave," only; while for the

censuses from 1855 to 1905 the population included, besides the white and negro elements, the Chinese, Japanese, and civilized Indians reported at each of those censuses. Table 22 exhibits these elements by percentages.

Table 24 exhibits the increase or decrease in 1905 as compared with 1895 expressed in numbers and percentages for the white, colored, Chinese, Japanese, and Indians. In Boston the percentage of increase of the number of white persons was 19.71; of colored, 25.97; Chinese, 9.81; Japanese, 471.43; and the Indians exhibited a decrease of 20 per cent. In Worcester the percentage of increase in the number of white persons was 30.03; the increase in colored, 3.17; in Chinese, 41.18; in Japanese, 100; in Indians, 50. The latter percentages are large, but the numbers upon which they are based, as will be seen by Table 23, are very small.

[1] No change since 1895.

Table 25 shows for the same cities and towns the relative proportion of these different elements in the total population. For instance, in 1905 the total population of Boston is considered as 100 per cent. Of this total the white formed 97.83 per cent; the colored, 2.01; the Chinese, 0.15; the Japanese, 0.01; and for the Indians it was less than one one-hundredth of one per cent. The negro element, on a basis of percentages, seems to be larger in Cambridge than in any other city of the Commonwealth. Everett comes next and is closely followed by New Bedford. The smallest percentage appears to be in the city of Chicopee, where it is less than one one-hundredth of one per cent.

[1] Less than one one-hundredth of one per cent.

F. Population Classified by Conjugal Condition.

Of the entire population in Massachusetts on May 1, 1905, over one-half, or 55.54 per cent, were single; over one-third, or 37.76 per cent, were married; about one-sixteenth, or 6.36 per cent, were widowed; while about one-fourth of one per cent were divorced. The proportion of the population whose conjugal condition was unknown is too small to materially affect the figures and for this reason it is omitted from the discussion of the results. In considering the statistics of conjugal condition as applied to the whole population it should be borne in mind that chil-

dren as well as adults are included, and for this reason there is a much larger proportion of single persons among the population than of married, widowed, or divorced.

The number and percentage of each of the classes in the aggregate and by sexes is shown in Table 26 for each census year since 1875, omitting 1880, at which time the United States did not show the results so far as the number of the different classes of the population of that year were either single, married, widowed, or divorced.

TABLE 26. *Conjugal Condition, by Sex, at Each Census Period, 1875–1905.*[1]— *Numbers and Percentages.*

Unknown,	2,360	0.08	1,770	0.06	590	0.02

[1] The census year 1880 is omitted since the statistics of conjugal condition were not obtained for that year.

[2] Less than one one-hundredth of one per cent.

Considering briefly the results regarding the conjugal condition of males and females respectively for 1905, it appears that of the 1,461,589 males in the State, 57.25 per cent were single, 38.94 per cent married, 3.52 per cent widowed, and 0.17 per cent divorced. The number of females in the State was 1,542,091, of whom 53.92 per cent were single and 36.65 per cent married. The widowed females constituted 9.06 per cent of the total number of females or nearly three times the percentage of widowed males, showing that a greater proportion of widowers than of widows evidently remarry. The divorced women constituted 0.33 per cent of the total number of females or considerably more than

that of divorced males. This indicates that divorced men have remarried to a greater extent than divorced women.

Of the total population in 1905, the males constituted 48.66 per cent and the females, 51.34 per cent. Of the single persons, the males constituted 50.16 per cent, and the females 49.84 per cent. Of the married persons, the males constituted 50.17 per cent, and the females 49.83 per cent. The percentage of widowed females of all the widowed persons was very much more than that of widowed males, or 73.06 per cent as compared with 26.94 per cent. The divorced females constituted 66.75 per cent of all the divorced persons, as against 33.25 per cent for divorced males. Of the persons whose conjugal condition is unknown, 75 per cent were males and 25 per cent were females.

The Census of 1905 as compared with the Census of 1900 shows an increase of seven per cent in the single persons; an increase of 7.63 per cent in married persons; an increase of 8.28 per cent in widowed persons, and 20.29 per cent in divorced persons. The number whose conjugal condition is classified as "unknown" shows a decrease of 74.97 per cent in the comparison of the Census of 1905 with the Census of 1900.

The correlated facts of general nativity, color and race, and conjugal condition are more impressive when given by occupations, and for that reason are omitted from this volume, but may be found in Volume II of the current work, where the occupations as presented exhibit the number of persons of a given trade or occupation by place of birth, parent nativity, grandparent nativity, color and race, conjugal condition, and degree of illiteracy.

Table 27 shows for the year 1905 the conjugal condition, irrespective of sex, of all persons residing in the 33 cities and the 321 towns and the percentage of each class in the cities and the towns.

TABLE 27. *Conjugal Condition for the 33 Cities in the Aggregate and the 321 Towns in the Aggregate, 1905. — Numbers and Percentages.*

CONJUGAL CONDITION.	Total Number	Number in Each Class in 33 Cities	Number in Each Class in 321 Towns	Percentage in Cities	Percentage in Towns
Single,	1,668,167	1,143,560	524,607	68.55	31.45
Married,	1,134,320	749,194	385,126	66.05	33.95
Widowed,	191,157	124,715	66,442	65.24	34.76
Divorced,	7,676	4,691	2,985	61.11	38.89
Unknown,	2,360	2,165	195	91.74	8.26
TOTALS,	3,003,680	2,024,325	979,355	67.39	32.61

The general trend of the percentages seems to indicate that about two-thirds of the persons classed as single, married, widowed, and divorced were living in the cities and one-third was living in the towns.

The next table (28) gives for the census years 1895 and 1905 the number of single, married, widowed, divorced, and unknown who were residing in the 33 cities and the 27 towns having a population of 8,000 or over in 1905.

TABLE 28. *Conjugal Condition for Places of 8,000 Inhabitants and Over in 1905.—Comparisons for 1895 and 1905.*

We find that in the 33 cities in 1905 there were 1,143,560 persons who were classed as single, and in 1895 there were but 930,702; and in the 27 towns 170,815 persons were classed as single in 1905 and 131,436 in 1895. Considering the other 294 towns of the State, there were 353,792 single persons in 1905 and 322,892 in 1895.

G. Population Classified by Families.—Size, Number, and Kind of Habitation.

The presentation of families by exact size comprehends first the number of families of each size, that is, persons to a family, from families of one person to families of 16 persons and over, both inclusive. Table 29 presents a summary for the State of the number of families of the principal sizes, and the population represented by each size for the census years 1875, 1885, 1895, and 1905. Institutions have been classified as families and distributed according to the number of persons in each.

TABLE 29. *Families Classified by Size and Compared with the Population for the Census Years 1875, 1885, 1895, and 1905.*

The word "family" for purposes of the census includes not only the normal family as generally understood, but also persons living alone and all larger aggregations of people having only the tie of a common roof and table, as the inmates of hotels, hospitals, prisons, and asylums. Considered as regards great bodies of people the presence of these "census" families does not have any very appreciable effect on the average size of the family. A very good illustration of this point is afforded by Table 30 which shows the number of private families, so-called, the number of hotels, and the number of institutions, together with the average size of all families, the average size of private families, hotels, and institutions. In 1895 the average size of the private family was 4.49 and in 1905, 4.44. In 1895 the average size of hotel families was 24.80 and in 1905, 18.29. The inmates of institutions, etc., being considered as identical families in each instance, we note that in 1895 the average size was 79.33 and in 1905, 54.47. Notwithstanding the large number of hotels, and the population represented by them and the large so-called "census" family, the average size of all private families, hotels, and institutions was but 4.57 in 1895, and 4.55 in 1905. After eliminating all aggregations of people which could not properly be considered as constituting a normal family, it is

found that the average size of the family for the State as a whole was reduced from 4.55 to 4.44, or a difference of 0.11. For small bodies of population, as counties, cities, and towns, in which these large aggregations of people are located, the average size of family will, of course, be affected according to the number of such institutions.

Table 31 shows the number of families and population by classified sizes for 1875, 1885, 1895, and 1905, and the average size for each class.

TABLE 31. *Families by Classified Sizes for the Census Years 1875, 1885, 1895, and 1905. — Numbers and Average Size.*

SIZE OF FAMILIES.	Numbers	Population	Average Size
1875.	359,009	1,651,912	4.60
Families: 1 person,	11,869	11,869	1.00
Families: 2 to 7 persons,	310,222	1,263,242	4.07
Families: 8 to 13 persons,	34,844	317,091	9.10
Families: 14 persons and over,	2,074	59,710	28.79
1885.	424,415	1,942,141	4.58
Families: 1 person,	17,141	17,141	1.00
Families: 2 to 7 persons,	362,194	1,461,327	4.03
Families: 8 to 13 persons,	42,077	382,926	9.10
Families: 14 persons and over,	3,003	80,747	26.89
1895.	547,385	2,500,183	4.57
Families: 1 person,	21,836	21,836	1.00
Families: 2 to 7 persons,	468,863	1,887,439	4.03
Families: 8 to 13 persons,	52,841	481,346	9.11
Families: 14 persons and over,	3,845	109,562	28.49
1905.	660,053	3,003,680	4.55
Families: 1 person,	27,637	27,637	1.00
Families: 2 to 7 persons,	563,430	2,249,908	3.99
Families: 8 to 13 persons,	64,550	588,171	9.11
Families: 14 persons and over,	4,436	137,964	31.10

From this table it is seen that the families of one person in 1905 numbered 27,637, as compared with 21,836 in 1895. The families containing from two to seven persons in 1905 numbered 563,430 and represented a population of 2,249,908 persons, the number of persons to a family being on an average 3.99. In 1895 the average size of families containing from two to seven persons was 4.03. The percentage was the same in 1885 and was 4.07 in 1875. Families from eight to 13 persons had practically the

same average in each census year, being 9.11 in 1905 and in 1895, and 9.10 in 1885 and 1875. For families containing 14 persons and over, the average size in 1905 was 31.10; in 1895, 28.49; in 1885, 26.89; and in 1875, 28.79.

Table 32 shows the number of families and population for 1875, 1885, 1895, and 1905 by classified sizes and the percentages of the number of families and population of each size of total families and total population.

TABLE 32. *Families by Classified Sizes for the Census Years 1875, 1885, 1895, and 1905. — Percentages of Total Families and Population.*

SIZE OF FAMILIES.	Numbers	Population	PERCENTAGES OF —	
			Total Families	Total Population
1875.	359,009	1,651,912	100.00	100.00
Families: 1 person,	11,869	11,869	3.31	0.72
Families: 2 to 7 persons,	310,222	1,263,242	86.41	76.47
Families: 8 to 13 persons,	34,844	317,091	9.70	19.20
Families: 14 persons and over,	2,074	59,710	0.58	3.61
1885.	424,415	1,942,141	100.00	100.00
Families: 1 person,	17,141	17,141	4.04	0.88
Families: 2 to 7 persons,	362,194	1,461,327	85.34	75.24
Families: 8 to 13 persons,	42,077	382,926	9.91	19.72
Families: 14 persons and over,	3,003	80,747	0.71	4.16
1895.	547,385	2,500,183	100.00	100.00
Families: 1 person,	21,836	21,836	3.99	0.88
Families: 2 to 7 persons,	468,863	1,887,439	85.66	75.49
Families: 8 to 13 persons,	52,841	481,346	9.65	19.25
Families: 14 persons and over,	3,845	109,562	0.70	4.38
1905.	660,053	3,003,680	100.00	100.00
Families: 1 person,	27,637	27,637	4.19	0.92
Families: 2 to 7 persons,	563,430	2,249,908	85.36	74.91
Families: 8 to 13 persons,	64,550	588,171	9.78	19.58
Families: 14 persons and over,	4,436	137,964	0.67	4.59

If we analyze the results for 1905, as shown by the percentages given in this table, we find that the families which number one person only represent 4.19 per cent of the total families and 0.92 per cent of the total population. Families of from two to seven persons represent 85.36 per cent of the total number of families and 74.91 per cent of the total population; families of from eight to 13 persons, 9.78 per cent of the total families and 19.58 per cent of the total population; and families of 14 persons and over, 0.67 per cent of the families and 4.59 per cent of the total population.

The number of families and the average size for the cities and towns containing 8,000 inhabitants and over in 1905, distributed by private families, hotels, institutions, etc., are shown in Table 33.

The highest average size of private families in the cities is found in Chicopee, in which city were reported 3,692 families, with an average size of 5.42 persons; in the towns the highest average size is found to be 5.21, in the town of Ware. The largest hotel family in the cities, so far as the average size is concerned, is found to be in Boston (55.03); and in the towns is found to be in Brookline, where the average size is reported as 141.50. The largest average family in institutions, etc., in the cities is

found in Northampton, the average size being given as 162.46, and in the towns is found in Danvers where the average size is given as 670.

On pages 781 to 802 are shown the number of families classified by kind of habitation for the State and counties, and for cities and wards, arranged alphabetically, except Boston, which is presented first. The classification includes dwelling houses, hotels, business blocks, club houses, camps, vessels or boats, stables, shanties, and institutions, etc. Families living in dwelling houses are divided into the number with boarders and the number without boarders. On page 783 is given the manner of reading the table, which may be repeated here: For the State we find 90,404 families *with* boarders, having a population of 561,963, living in dwelling houses; 562,690 families *without* boarders, with a population of 2,349,987, living in dwelling houses; 871 families of 15,932 persons living in hotels; 2,408 families of 4,371 persons living in business blocks; 161 families of 723 persons living in club houses; 154 families of 597 persons living in camps; 110 families of 319 persons in vessels or boats; 740 families of 1,521 persons in stables; 1,345 families of 4,534 persons in shanties; and 1,170 families of 63,733 persons in institutions, etc. Lines for the counties or cities may be read in a similar manner. There are 21 families in the State living in places other than as classified. These places of abode include railroad stations, school and church basements, cars, tents, etc. (See explanation in foot-notes on page 785.) Seven of these families are living in cities and the remaining 14 are living in the following towns: Bourne, 1 family of 1 living in a railroad station; Provincetown, 1 family of 1 living in a school basement; Brimfield, 1 family of 1 living in a railroad station; West Springfield, 1 family of 9 living in a car barn; Lincoln, 1 family of 1 living in a dog kennel; Natick, 1 family of 5 living in a greenhouse; Millis, 1 family of 10 living in a tent; Needham, 2 families of 2 living in a car; Wellesley, 1 family of 1 living in a greenhouse; Wrentham, 1 family of 1 living in a church; Northbridge, 1 family of 3 living in a church basement; Shrewsbury, 1 family of 3 living in a church basement; and Winchendon, 1 family of 24 living in a car.

The results shown on page 785 for the State are brought forward in Table 34 and show the average size of family and the percentages of total families and total population.

Institutions, etc.,	1,170	63,733	54.47	0.18	2.12

The average size of all the families in the State is, as previously stated, 4.55; in those dwelling houses where no boarders were taken the average size of the families is 4.18, and they contain 85.25 per cent of all the families in the State and 78.24 per cent of the total population. In those dwelling houses where boarders were taken, there were 90,404 families with a total population of 561,963, the average size of the family being 6.22 and forming 13.70 per cent of the aggregate number of families in the State and 18.71 per cent of the aggregate population. The word "boarders" covers those who live and take their meals in the same family and those who merely lodge with the families.

H. Population Classified by Relationship to Head of Family.

The relationship which each person in the State bears to the head of the family in which such person lives is shown on page 473. In 1875 this was shown for those persons only who were not engaged in gainful employment, but were simply living at home. In 1885, however, the presentation was broadened to show for the first time the distribution of the whole population by such relationship. Up to that time no such tabulation had ever been made in any census, either State or National, although the National Census of 1880 included the necessary interrogatories in its schedules. The form of presentation adopted in 1885 is practically embodied in the present tabulation, and we are therefore able to make comparisons showing the changes in the composition of the family, as affected by relationship, which have taken place during the decade. All the facts contained in this presentation are of importance in the study of the social questions which are affected by, or relate to, the status of the family.

From Table 35 we learn that in 1905 of the whole number of males (1,461,589) there were 550,230, or 37.65 per cent, who were heads of families, and of the 1,542,091 females in the State, 110,575, or 7.17 per cent, were heads of families, making a total of 660,805 persons occupying the position as heads of families. This number constituted 22 per cent of the total population.

[1] Less than one one-hundredth of one per cent.

In considering the subject of Conjugal Condition we saw that the number of married males was 569,062; it is evident, therefore, that not all the married males are heads of families. Single, widowed, and divorced males are often heads of families, and many married males live with parents, relatives, and as boarders in families other than their own.

There are 497,934 wives whose husbands are considered as heads of families, while there are 76 husbands whose wives are recognized as heads of families; 5,913 fathers and 17,681 mothers of heads of families live with such heads; and 601,576 sons and 613,080 daughters, or a total of 1,214,656 sons and daughters, live with their parents. These illustrations are sufficient to explain the facts brought together in the preceding table, in which corresponding relationships for males and females are combined.

From this presentation a summary is drawn in which the relation to head of family is shown in a condensed form, comprehending heads of families, husbands or wives, those who are blood relations, those having legal relationship, those who are related to heads of families by virtue only of residence or of employment, and other relationships, for the census years 1885, 1895, and 1905.

Other relationships,	655	0.04	3,981	0.26	4,636	0.15

In the preceding table, which shows the degrees of relationship, the designation "legal relationships" includes those persons who are related to the head of the family by marriage, adoption, etc. The totals for uncles and aunts, nephews and nieces, and cousins are divided equally for want of an exact classification between blood relatives and legal relationship. The designation "by virtue of residence" includes boarders, lodgers, guests (hotel), patients, inmates, pupils, students, and visitors. The designation "by virtue of employment" includes domestic and personal servants, stewards or housekeepers, superintendents, wardens or matrons, assistants, hired men and boys, and companions. If we consider the results shown in Table 36 we find, as has been stated, that heads of families in 1905 constituted 22 per cent of the total population; that husbands and wives represented 16.58 per cent; blood relatives numbered 1,343,193 (including 1,214,656 sons and daughters), or 44.72 per cent; while those having legal relationship numbered 118,688, or 3.95 per cent of the total population. There were 287,729 persons, or 9.58 per cent, whose relation to the head of the family was by virtue of residence, and 90,619, or 3.02 per cent, by virtue of employment.

I. Population Classified by State of Birth[1] of Native Born.

The native-born population of Massachusetts in 1905 numbered 2,085,636, and constituted 69.44 per cent of the total population. The proportion of persons of native birth to total population at each census since 1850 has been considered in detail under the heading "Native and Foreign Born," page xxxix.

The whole number of persons of native birth who were born in Massachusetts and were living in Massachusetts in 1905 was 1,665,102, or 79.84 per cent of the entire native-born population of the Commonwealth. In 1890 this percentage was nearly as large, or 79.43. On the other hand, there were 420,534 persons of native birth, or 20.16 per cent, who were born in some other part of the United States, but who were living in Massachusetts in 1905. Ten years ago this class of persons numbered 369,265 and constituted 21.28 per cent of all the native born living in Massachusetts at that census.

TABLE 37. *Number and Percentage of Native Born Living in Massachusetts who were Born in Massachusetts and Other States at Each Census Period, 1850–1905.*[1]

CENSUS YEARS.	Total Native Born	NATIVES OF MASSACHUSETTS LIVING IN STATE OF THEIR BIRTH		BORN IN OTHER STATES BUT LIVING IN MASSACHUSETTS

1900,	1,959,022	1,543,089	78.77	415,933	21.23
1905,	2,085,636	1,665,102	79.84	420,534	20.16

[1] The census year 1855 is omitted as these figures were not obtained for that year.

A comparison of the percentages for 1905 with those for 1885, 1890, 1895, and 1900 does not show very marked fluctuations so far as Massachusetts is concerned.

The number of persons of native birth living in Massachusetts is distributed by state of birth in Table 38, giving in each case the percentage the figures bear to the total number of native born. It presents the states which have contributed to make up the native-born population in this Commonwealth and needs little explanation. There were, for illustration, 95,241 persons born in Maine who on May 1, 1905 lived in Massachusetts; this number constituted 4.56 per cent of all the native born in the State and was the largest contribution, except that of Massachusetts, made by any state to the native-born population of Massachusetts. The entire New England section, with the exception of Massachusetts, contributed

[1] The term "state of birth" in this analysis covers both states and territories.

to the latter's quota of native-born population 267,570, or 12.82 per cent of all the native born. Outside of the New England States New York contributed 74,145, or 3.55 per cent of all the native born, and was followed by Pennsylvania with 13,269, New Jersey with 7,845, and Virginia with 7,763. The details covering each state are given in numerical order and can be easily read.

Excluding the number born in Massachusetts and considering in detail the number born in each state and territory of the United States who were found living in Massachusetts on May 1, 1905, and taking the number of persons born in Massachusetts who were living in other states as shown by the Federal Census of 1900, we obtain Table 39 — a showing which exhibits the states and territories contributing most largely to the population of Massachusetts in 1905 and the number contributed by Massachusetts to the native-born population of certain other states of the Union in 1900. The whole number of persons born in each specified state or territory of the United States, except Massachusetts, and living in this Commonwealth is considered as 100 per cent; the respective proportions contributed by these states and territories can be comprehended readily by an inspection of the table. For instance, the number of native born who were born in other states and territories but who, on May 1, 1905, were living in Massachusetts was 420,534; of this number 95,241, or 22.65 per cent, were born in Maine. Of the total number born in Massachusetts and living in other states and territories in 1900, namely, 299,614, Massachusetts contributed to the State of New York 45,457 persons, or 15.17 per cent; to Rhode Island, 33,731, or 11.26 per cent; and to Connecticut, 32,560, or 10.87 per cent.

Table 40 requires no analysis. It exhibits the principal states which have contributed to the native-born population of each of the 33 cities of the Commonwealth, the figures for each city including also the number contributed by Massachusetts. The State is given first followed by the cities arranged in the order of their rank in population in 1905.

J. Population Classified by Country of Birth of Foreign Born.

It was shown in Table 13 that in 1850, the first census in which the nativities of the population were ascertained, the foreign-born population of Massachusetts numbered 164,024 and in 1905 it numbered 918,044, an increase of 459.70 per cent. The foreign born constituted 16.49 per cent of the entire population in 1850 and 30.56 per cent of the entire population in 1905. The statistics of the nativities of the foreign born by countries of birth in detail are of peculiar value, therefore, as indicating the number of persons of different nationalities who were living in Massachusetts at the Census of 1905 and their relative importance as a contributing element to this constantly increasing portion of our population. Table 41 shows the various countries from which our foreign-born element is derived and the percentage that each country bears to the total foreign-born population.

TABLE 41. *Number of Foreign-born Living in Massachusetts, 1905.*

[1] Exclusive of New Brunswick, Nova Scotia, and Prince Edward Island.

It is seen that the persons born in Ireland contributed more than any other nationality to the foreign-born element of the State, — 236,373, which represents 25.75 per cent of the total foreign born in the Commonwealth. Persons of French descent born in Canada, exclusive of those born in New Brunswick, Nova Scotia, and Prince Edward Island, stand second in numerical importance, numbering 118,247, or 12.88 per cent of the total foreign born. These are followed in importance by persons born in England who number 83,893, or 9.14 per cent, and those born in Nova Scotia who number 66,131, or 7.20 per cent. Persons born in Italy, those of English descent born in Canada, exclusive of those born in New Brunswick, Nova Scotia, and Prince Edward Island, and those born in Russia

are numerically of about the same importance, contributing 5.51, 5.44, and 5.37 per cent of the total foreign born.

In Table 42 a comparison is made of the different elements of the foreign born for the Censuses of 1885, 1895, and 1905. The relative growth of each nationality is shown, also their increasing or decreasing importance with respect to the total foreign born.

TOTALS,	918,044	100.00	764,930	100.00	526,867	100.00

[1] Exclusive of New Brunswick, Nova Scotia, and Prince Edward Island.
[2] Includes Finland.
[3] Includes Bohemia and Hungary.
[4] Includes Syria and Armenia.

Ireland furnishes the largest part of the foreign-born population of Massachusetts (236,373) and the Irish have been the leading element during the 20 years considered in this table, but the percentage of persons born in Ireland of the total foreign born has decreased from 46.43 to 25.75 per cent. No other country shows such a marked decrease. England, Nova Scotia, Germany, New Brunswick, Scotland, Wales, and Switzerland show a decrease since 1885, but none of them has decreased so much as two per cent.

Russia, including Finland, shows the highest increase of any country; in 1885 the percentage from this country was less than one-half of one per cent of our total foreign-born population, while in 1905 it formed 6.43 per cent of the total foreign born and was the fifth country in numerical importance. In 1885 the Italian foreign-born were but 0.76 per cent, but in 1905 they had increased to 5.51 per cent. Persons born in Canada of English descent rank next in order of increase, rising from

3.01 in 1885 to 5.44 in the Census of 1905. Numerically they are much fewer than persons born in Canada of French descent, who, next to Ireland, form the largest element in the foreign-born population, but this class has increased less than one per cent in the 20 years. Sweden furnished 4.09 per cent of the foreign born in 1905, a gain of over two per cent since 1885. Poland furnished only 0.24 per cent of the foreign born in 1885, rising to 2.34 per cent in 1905. Austria in 1885 formed about the same per cent as Poland (0.26) and has now increased to 2.16 per cent. Portugal and the Western Islands have increased from 1.16 to 3.04 per cent. Other countries which are numerically important show increase in the following order: Turkey (including Syria and Armenia), Newfoundland, Greece, Norway, Prince Edward Island, Denmark, etc.

For the purpose of a presentation on the basis of cities, the foreign-born element in 1905 is grouped for convenience as follows:

a. British American, comprising the natives of Canada and Newfoundland.

b. Irish, comprising the natives of Ireland.

c. British, comprising the natives of England, Scotland, Wales, and British Possessions.

d. Germanic, comprising the natives of Germany, Austria (including Bohemia and Hungary), Holland, Belgium, and Switzerland. The word "Germanic" is used in this classification with a more limited meaning than might be implied by the word "Teutonic," since the English — strictly speaking a Teutonic people — are grouped in these tables with natives of Scotland and Wales as "British."

e. Scandinavian, comprising the natives of Norway, Sweden, Denmark, and Finland.

f. Russian, comprising the natives of Russia, exclusive of Finland and Poland.

g. Polish, comprising natives of Poland only.

h. Greco-Latin, comprising the natives of France, Italy, Spain, Portugal (including Western Islands), and Greece.

i. Asiatic, comprising the natives of China, Japan, and other parts of Asia.

For each of the above groups there are shown for each of the 33 cities, in a series of tables, the proportions, expressed in percentages, which their number bore to the total population and to the total foreign born in 1905, and in addition the density, or number of persons to a square mile, thus illustrating the distribution of each of these elements among the cities of the State.

The British Americans were found mainly in the cities of Boston, Fall River, Lowell, and Cambridge. On the basis of the percentage which the British Americans formed of the total foreign born residing in each of the 33 cities, the highest percentage is found in Gloucester, namely, 56.01 per cent; followed in order by Marlborough, 54.33 per cent; Melrose, 48.98 per cent; Salem, 47.46 per cent; Haverhill, 45.01 per cent; and Beverly, 44.10 per cent. On the basis of proportion to the total population, the highest percentage is also found in the city of Gloucester, with Lowell standing second; that is to say, out of every 100 persons in the total population of the city of Gloucester, about 18 were British Americans and in Lowell nearly 17 out of every 100; nearly 16 in Fall River, about 15 in Holyoke, 14 in Salem, 13 in Fitchburg and New Bedford, and so on. The number of British Americans in Chelsea was 4,091, forming 10.97 per cent of the total population and 29.47 per cent of the total foreign-born population. They numbered 1,885 to the square mile, the largest number per square mile in any city. This is closely followed by Somerville where the number per square mile was 1,848.

The Irish were found mainly in Boston and in the cities of Woburn, Lowell, Cambridge, Holyoke, and Newton where they formed over 10 per cent of the total population. Considering the total foreign born in the cities, the largest percentage, 50.51, was found in Woburn, followed by 39.07 in Newburyport, 36.59 in Newton, 34.41 in Cambridge, 34 in Pittsfield, 32.84 in Northampton, 32.80 in Waltham, and 31.81 in Boston. The number per square mile outside of Boston was greatest in Cambridge, Somerville, and Chelsea.

The British, comprising the natives of England, Scotland, Wales, Australia, and other British possessions predominated in Boston and Fall River. In Lawrence the number per square mile was 881, followed by Chelsea with 551, Somerville with 490, Boston with 434, and New Bedford with 400. In proportion to the total population, this group seems to be quite evenly distributed throughout the cities, the largest proportions being found in Fall River and New Bedford. Notable proportions are found in Lawrence, Quincy, Lowell, and North Adams. In proportion to the total foreign born the largest percentage is found in Fall River where a little more than one-quarter of the foreign born were British. In New Bedford slightly under one-quarter of the foreign born were British, while in North Adams the proportion was 19.92 per cent.

The Germanic peoples in the above enumeration consist almost entirely of natives of Germany, Bohemia, and Hungary, the other contributing nationalities being relatively of slight importance. They were found in 1905 in considerable bodies in the city of Boston and in smaller numbers in Lawrence, Holyoke, Chicopee, Springfield, and New Bedford. The proportion of this class to the total population was greatest in Chicopee, where they comprised 10 per cent of its population. They formed 6.05 per cent in Holyoke, and 4.73 per cent in Lawrence. The proportion which they bore to the total foreign-born element was greatest in Chicopee, where more than one-fourth of the foreign born were of this class.

The Scandinavians, comprising the Norwegians, Swedes, Danes, and Finns, appeared in considerable numbers in Worcester and Boston, where

their importance was numerically about the same. In Worcester they formed 7.66 per cent of the total population and 23.65 per cent of the total foreign born, and in Boston they formed 1.55 per cent of the total population and 4.41 per cent of the total foreign born.

There were more Russians in Boston than in any other city, but the largest proportion of the total population was found in Chelsea with 10.11 per cent; Boston ranking second, with 4.05 per cent. In the remainder of the cities less than three per cent of the total population were Russians. The percentage of total foreign born was also greatest in Chelsea, 27.15 per cent, and the number of persons to a square mile was greatest in this city, 1,737.

The Greco-Latins, comprising principally natives of the Mediterranean countries, were most numerous in Boston, followed by New Bedford and Fall River. The largest proportion to the total population for this group was found in New Bedford with 10.60 per cent; the proportion which they bore to the total foreign born was also greatest there, being 24.82 per cent. Of the other cities where the Greco-Latins formed a noticeable percentage of the foreign born, Taunton, Fall River, and Pittsfield are the most prominent. Considerable proportions were also found in some of the other cities, particularly Quincy, Beverly, Gloucester, Lawrence, Boston, and North Adams. The number per square mile was naturally highest in Boston, followed by Lawrence and Somerville.

[1] Less than one person per square mile.

The Asiatics comprise the Chinese, Japanese, and persons born in other parts of Asia. They were found principally in Boston, comparatively few having spread to other cities. The largest proportions to the foreign born were found in Haverhill, Boston, Newton, Marlborough, Gloucester, Lynn, Pittsfield, and Salem. In other cities their numbers and proportions were practically insignificant.

The relative proportions of persons of the various nationalities found in the cities, compared with the whole number of such persons found in the State at large, and the proportion which the whole number in the

cities bears to the total number in the State are given in Table 52 for each nationality having 1,000 persons or over.

TABLE 52. *Foreign Born Classified by Country of Birth.—Comparisons for the State and 33 Cities.*

[1] Including Bohemia and Hungary.

The percentages in the last column of the preceding table are to be contrasted both with one another and with the proportion which the persons of native birth in the cities bear to the total native born in the State, namely, 64.45 per cent.

K. Population Classified by Foreign Parentage.

In the United States Census of 1850 the foreign-born population was first classified according to country of birth, but this was not done in Massachusetts until the State Census of 1885. In 1870 the United States extended their inquiries to include, not only the particular place of birth, but also a statement of the number having fathers or mothers of foreign birth, respectively; but no effort was made at that census to ascertain the nationality of parents according to specified countries. As a result of the compilations made in 1870 it was ascertained that the whole number of persons of foreign parentage in Massachusetts was 626,211, and that they constituted 42.97 per cent of the total population at that census. The whole number of persons who were themselves of foreign birth was 353,319, very nearly all of whom were of foreign parentage,

a small number having native-born parents, the exact number not being stated.

No information was afforded by the State Census of 1875, however, as to the extent to which each of the foreign countries had contributed to that element of the population who were of native birth but who had foreign-born parents, so that in compiling the Census of 1885 an elaborate tabulation was undertaken in order to ascertain the proportion contributed by each nationality to the whole element of foreign parentage. In the Census of 1905 it was decided to omit presentations which exhibited the place of birth of mother as well as father, on the ground that the father was the one who gave nationality to the child and that the mother was from the statistical standpoint a negligible quantity.

It must be borne in mind that there is a marked difference between the meaning of a *person of foreign birth* and a *person of foreign parentage,* the first being understood as representing the person and birthplace of the *present generation,* and the second the person and birthplace of the *father* of those of the present generation (*i.e.*, the second generation). On this basis, while there were in Massachusetts on May 1, 1905, 918,044 persons who were themselves of foreign birth, there were 1,800,609 persons whose fathers were of foreign birth, and the latter formed 59.95 per cent of the total population, or 29.39 per cent more than the number of persons who were of foreign birth.

Table 53 gives for the census years from 1870 (except 1875) the total population, together with the numbers and percentages of persons of foreign birth and persons of foreign parentage.

TABLE 53. *Persons of Foreign Birth and Persons of Foreign Parentage at Each Census Period, 1870–1905.*[1] — *Numbers and Percentages.*

Census Years.	Total Population	Persons of Foreign Birth		Persons of Foreign Parentage	
		Numbers	Percentage of Total Population	Numbers	Percentage of Total Population
1870,	1,457,351	353,319	24.24	626,211	42.97
1880,	1,783,085	443,491	24.87	845,720	47.43
1885,	1,942,141	526,867	27.13	992,122	51.08
1890,	2,238,943	657,137	29.35	1,259,121	56.24
1895,	2,500,183	764,930	30.59	1,412,764	56.51
1900,	2,805,346	846,324	30.17	1,746,581	62.26
1905,	3,003,680	918,044	30.56	1,800,609	59.95

[1] No returns for parentage made in 1875.

Comparing the figures representing the element of foreign parentage at the last two censuses with figures showing the number of persons who were themselves of foreign birth, it appears that, although the foreign-born population shows a fractional increase since 1900 in its proportion to the total population, there has been about a two and one-third per cent decrease during the same period in the proportion which persons of foreign parentage bear to the entire population.

A small number (6,760) of the persons reported as of foreign birth are themselves of native parentage, so that a small proportion of the number of persons of *foreign birth* reported at each census is not included in the number of persons of *foreign parentage*. As the term "foreign parentage" includes all persons either of native or foreign birth who have foreign-born fathers, the remainder is considered to be of native parentage. Persons for whom the birthplace of parent is unknown have been included with the native parentage, as a matter of convenience purely, inasmuch as the main object is to determine the element of *foreign parentage* and its proportion to the entire population, and for the further reason that the proportion of persons of "unknown" parentage is quite small.

Table 54 shows a classification of persons of native parentage and persons of foreign parentage for the censuses from 1870, except 1875.

TABLE 54. *Persons of Native and Foreign Parentage. — Numbers and Percentages at Each Census Period, 1870–1905.*[1]

CENSUS YEARS.	Total Population	PERSONS OF NATIVE PARENTAGE		PERSONS OF FOREIGN PARENTAGE

In Fall River and Lawrence practically four-fifths of the total population were of foreign parentage, the exact percentages being 81.62 for Fall River and 81.49 for Lawrence. In Holyoke, Chicopee, and Lowell over three-fourths of the total population were of foreign parentage and the percentages were 78.99 for Holyoke, 76.13 for Chicopee, and 75.08 for Lowell. The next largest percentages are found in New Bedford and Boston where 72.34 and 69.03 per cent, respectively, were of foreign parentage. Chelsea had 68.66 per cent of foreign parentage, Quincy had 66.95 per cent of its population of foreign parentage, and Fitchburg, 66.80 per cent, practically the same as for Quincy. Other cities which had nearly two-thirds of their population of foreign parentage in 1905 were Worcester with 65.54 per cent, Cambridge with 65.16 per cent, and Woburn with 63.63 per cent. The cities having three-fifths of their population of foreign parentage were Gloucester with 61.29 per cent, North Adams with 61.13 per cent, Salem with 61.10 per cent, and Marlborough with 60.09 per cent. Among the cities having more than one-half but less than three-fifths of their population of foreign parentage were Taunton, 58.91 per cent; Waltham, 57.36 per cent; Malden, 57.26 per cent; Everett, 56.49 per cent; Somerville, 56.17 per cent; Northampton, 54.92 per cent; Lynn, 54 per cent; Newton, 53.15 per cent; Springfield, 52.70 per cent; Pittsfield, 52.63 per cent; and Brockton, 52 per cent.

Of the social forces which operate in the industrial world possibly none has a more subtle yet more far-reaching effect on our national welfare than has immigration. But while immigration itself exerts an active influence wherever it has an opportunity to be felt, its volume, and to a certain extent its character, is determined by the economic conditions prevailing in the field which it enters. Thus, in seasons of prosperity the stream of immigration to the United States has swollen to huge proportions and in seasons of depression the influx has greatly decreased, and even the

strange phenomenon of a stream flowing in the opposite direction has been observed.

The preceding analysis of the distribution of the population of foreign birth does not follow the racial classification used by the United States Bureau of Immigration and Naturalization, and for the purpose, therefore, of presenting a grouping in accordance with the latter, the statistics have been rearranged in the following tables. In so doing an arrangement of countries, intended to bring out in bold relief the relation which the numerical strength of the various racial or native elements in our population bear to each other and to the total population, has been substituted for the arbitrary alphabetical classification usually employed, it being conceived that for purposes of statistical comparison the arrangement in order of rank by numbers or percentages exhibits much more graphically the facts in which most readers are probably chiefly interested. Thus, it may be seen at a glance from Table 56 that the *Greeks,* with their increase since 1895 of 1,242.70 per cent, *are increasing with the greatest rapidity of all peoples of foreign parentage in our population;* that those of *Austrian* parentage are *second* on the list; that the *Italians* are *third,* etc., and that the *Irish,* although they still form the largest single element of foreign parentage in our population, *are now furnishing the smallest percentage of increase of all.*

The shifting of the immigration to our shores from the North to the South of Europe has been apparent for some years, both as a matter of common observation and of statistical fact, and these figures from our latest state census are but cumulative evidence, in a fresh and specific form, that the great additions to our Massachusetts population during the decade 1895–1905 were from the Slavic and Iberic races of Southern Europe.[1] That, therefore, which we have suspected, but perhaps too vaguely, for some years, we can no longer avoid accepting as fact, namely: that our problem of assimilation in the years immediately ahead must have to do less and less with Keltic and more and more with Slavic and Iberic infusions. This appears even more significantly when we take the various countries out of the classification according to which they are arranged in Table 56 and rearrange them as nearly as possible in racial groups, as in Table 57.[1] The annual exodus of immigrants to their native lands in Southern Europe must not, of course, be entirely overlooked in this connection, but it seems doubtful whether this custom is to become permanent to an extent sufficiently large to exert a perceptibly modifying influence upon the character of American citizenship.

[1] According to this classification natives of Greece, Spain, Portugal, and the greater portion of the natives of Italy are classed as belonging to the *Iberic* race; Austria, Poland, and Russia to the *Slavic;* Belgium, Norway, Sweden, Denmark, Holland, Germany, and England to the *Teutonic;* and France, the greater part of Switzerland, Scotland, Wales, and Ireland to the *Keltic.* The Bureau of Immigration and Naturalization in its statistics differentiates between the North and South Italians, but the Massachusetts Census takes no account of this difference. Hence the figures given in the tables under the Iberic classification include the North Italians who are, strictly speaking, Keltic; their number, however, is comparatively small and is hardly sufficient to affect the relative proportion of the racial groups. The Swiss, also, are not entirely homogeneous, being partly Teutonic, but the larger portions are classed as Keltic; and the Poles, though partly Teutonic, are generally Slavic.

From Table 57 it appears that the population of Slavic parentage in the State increased during the decade 1895–1905, 188.12 per cent; that those whose parents were of Iberic stock increased 180.74 per cent; that those whose parentage was Teutonic increased 22.71 per cent; and that the increase in the population of Keltic parentage was only 3.64 per cent.

Table 58 furnishes a comparison of the number of persons in Massachusetts returned by the Censuses of 1895 and 1905 who were *foreign born* of foreign parentage. The table also shows the increase by country of nativity both in absolute numbers and in percentages. The fifth and sixth columns of the table show the percentage of the persons of the nativity specified in relation to the total foreign-born population of foreign parentage of the State. Because of the numerous elements entering into this tabulation, the countries of birth are arranged alphabetically.

Table 59 gives the same data as Table 58 for the *native-born* population of foreign parentage.

Table 60 summarizes the population of Massachusetts according to the leading states and foreign countries of *parent nativity,* the totals being separated by sex.

Table 61 is a display of the population of foreign parent nativity by countries for the city of Boston, by wards.

Tables 62 and 63 give for the city of Boston the same data as are given in Tables 58 and 59 for the State.

Table 64 gives for the city of Boston in detail the same class of data as are given by leading states and foreign countries in Table 60 for the State.

Table 65 shows the dominant foreign parent nativity of the population of Boston by wards; and the subsidiary tables following show for each ward the percentage which the foreign parentage of the country specified is of the total foreign parentage of the ward, the total number of persons of foreign parentage of each country, and the two computations which enter into this total, namely, the *foreign born* whose parentage is of the country specified and the *native born* whose parentage is of the country specified.

L. Population Classified by Ages.

The classification of ages includes tables showing the number of persons by sex and totals for each year from one to 80 years and over, for those less than one year old the detail by months, and for those 80 years and over the detail by years, for each town, city, and county in the State. In some of the tables the classification by native and foreign born is also given. The tables are self-explanatory, and are as follows:

Ages: Under one to 80 years and over for towns, cities, counties, and the State.

Ages: Under one to 80 years and over for the cities and the State by native and foreign born.

Ages: Under one year in detail by months for towns, cities, counties, and the State.

Ages: 80 years and over in detail for towns, cities, counties, and the State, with a recapitulation for counties and the State by native and foreign born.

The average age for males was 28 years and 9 months, 29 years and 11 months for females, and 29 years and 4 months for both sexes. In 1895 the average age for males was 28 years and 4 months, and 29 years and 3 months for females, or an average age for the whole population of 28 years and 10 months. In 1885 the average age for males was 28 years and 3 months, 29 years and 2 months for females, and 28 years and 9 months for both sexes. In 1875 the average age of males was 27 years and 6 months, and for females, 27 years and 10 months, or an average for the whole population of 27 years and 8 months. The average death age for 1905 as given in the Massachusetts Registration Report was 38.71 years. The average age of the population above 20 years was for males 39 years and 11 months, for females 40 years and 9 months, and for all persons, 40 years and 4 months. In

casting these averages the small number whose ages are unknown or under one month has not been considered.

The concentration of ages upon the quinquennial periods noticed in all censuses is also noticeable in this, although not so marked. Persons 20 years of age numbered 55,217, while those 21 years of age numbered 55,924. In 1895 there were 51,670 persons 20 years of age, and 51,086 persons 21 years of age. Of persons 25 years of age, there were in the Census of 1905, 61,526, while of persons 26 years of age there were 56,839. In 1895 the number returned as 25 years of age was 57,641, while of age 26 there were 51,455. At the next quinquennial period, namely, age 30, we find 68,984, while the number returned of age 29 was but 50,039, and the number of age 31, 42,175. The number returned of age 35 was 61,068, while the number of age 34 was 46,942 and the number of age 36, but 46,309. This concentration upon the quinquennial periods apparent from these illustrations is not due to estimating on the part of those making the return so much as to the apparently natural tendency observed in every census to select a round year in making reply to the census enumerator when the age of the person approximates that year rather than the intermediate year. This error may be reconciled by classifying the ages by five and ten-year periods.

The ages given by months for persons under one year of age are summarized in Table 66.

10 months,	1,865	1,759	3,624
11 months,	1,049	907	1,956

The number of persons returned as being 11 months old was very small compared with the number given for the age succeeding (one year or 12 months), bearing out a common tendency to state the age of children after they have passed the tenth month as one year, rather than 11 months.

The distribution of the total number of persons 80 years of age and over is shown in Table 67.

TABLE 67. *Persons 80 Years of Age and Over, Classified by Age Periods, for the Census Years 1875, 1885, 1895, and 1905.*

Age unknown,	1,554	1,460	3,014	2,089	3,238	5,327

An interesting question arises under the discussion of ages relative to the excess of females over males. This excess in 1905 was 80,502. In 1895 the excess was 70,781; in 1885 the excess was 76,373; and in 1875, 63,146. In Table 70 this excess is distributed by age periods as regards native and foreign born for the census years 1885, 1895, and 1905.

The greatest concentration upon any one period of the excess of females is between 20 and 29 years, there being 31,741 more females than males between these ages. The next greatest concentration appears in the period from 60 to 79 years, where there is shown to be 23,678 more females than males.

The dependent and productive age periods are shown for the State and counties in Table 71 for 1875, 1885, 1895, and 1905.

From this table it will be seen that of the total population in 1905, 1,973,676 were from 15 to 60 years of age, generally denominated as the productive age, as against 1,654,156 in 1895, a gain of 319,520 over 1895, or 63.46 per cent of the whole gain in population. In this table the comparatively small number of persons for whom the age was returned as "unknown" is not considered. Those who are dependent on either their relatives or on their savings, or are above what is commonly known as the productive age, number 222,209 as against 180,347 in 1895.

In Table 72 is given, for the 33 cities and 27 towns containing 8,000 population and over in 1905, the number of persons of school age (males

and females), of militia age, and of voting age. Persons of school age are considered to be those from five years to 20 years of age; those of militia age include all males from 18 to 44 years of age, both inclusive, and constitute the potential militia of the State; and those who are classified under the term "voting age" include males 21 years of age and upward, that is, potential voters.

294 Towns (under 8,000),	93,904	92,172	186,076	139,487	210,677

There were 852,315 persons of school age in Massachusetts in 1905 and in 1895 the number was 704,570, showing an increase during the ten-year period of 147,745, or 20.97 per cent.

In 1905 males of militia age numbered 670,832 as against 567,164 in 1895, showing an increase of 18.28 per cent. The increase in the native-born males of militia age from 1895 to 1905 was 12.91 per cent, while the increase in the foreign-born males of militia age was 26.66 per cent.

In 1905 there were 905,583 persons of voting age, while in 1895 there were 748,645, an increase during the ten years intervening of 20.96 per cent. The potential voters in 1905 formed 30.15 per cent of the population, while in 1895 the same class constituted 29.94 per cent, showing a slight increase.

In the 33 cities of the Commonwealth we find that there were 578,051 persons of school age, 463,106 males of militia age, and 602,070 males of voting age; in the 27 towns there were 88,188 persons of school age, 68,239 males of militia age, and 92,836 males of voting age; and in the 294 towns having a population under 8,000 there were 186,076 persons of school age, 139,487 males of militia age, and 210,677 males of voting age.

M. Population Classified by Political Condition.

The potential voting strength of a State is expressed by the number of its males 21 years of age and over, but by this is not meant the actual number of legal or registered voters. It represents rather the number of males who, from the standpoint of age alone, are eligible to vote, aside from any qualifications based upon education, length of residence, or considerations of a like nature imposed by the National or the State Statutes, and presumptively within the power of the individual to acquire for himself.

Upon this basis, there were in 1905 in Massachusetts 905,583 males of voting age, and of this number 674,174 were legal voters, that is, persons who have complied, either by term of residence or their own individual act, with all the essentials, *except registering,* required by the constitution and the statute law, and this number includes 185,012 persons of foreign birth who have become naturalized. Table 73 which follows shows for 1875, 1885, 1895, and 1905 the number of ratable polls, legal voters, naturalized voters, and aliens in this Commonwealth.

TABLE 73. *Citizenship in Massachusetts.*

CENSUS YEARS.	Ratable Polls	Legal Voters	Naturalized Voters	Aliens
1875,	449,686	351,113	69,271	79,136
1885,	567,959	442,616	98,730	99,131
1895,	766,233	560,802	138,148	160,610
1905,	919,783	674,174	185,012	192,344

From tabulations of the Censuses of 1875, 1885, 1895, and 1905, we are able to show in the following table the number of males of voting age, the percentage of increase between census years, and the percentage the males of voting age bear to the total number of males:

TABLE 74. *Fluctuation in Number of Males of Voting Age for the Census Years 1875, 1885, 1895, and 1905.*

CENSUS YEARS.	Males of Voting Age	Percentage of Increase over Previous Years	Percentage of Total Male Population
1875,	455,861	–	57.39
1885,	555,969	21.96	59.60
1895,	748,645	34.66	61.63
1905,	905,583	20.96	61.96

It should be borne in mind that every male twenty years of age residing in the Commonwealth on the first day of May, in any year, is a poll, and unless exempted therefrom is subject to a poll tax. The polls thus defined are made up of three classes: first, those who are legal voters; second, those who are aliens and who are not voters by reason of that fact; third, those who are not voters by reason of disability other than the incident of foreign birth. The total voters numbered 674,174, or 73.30 per cent of the total polls. We repeat that the term "legal voter" means under the census enumeration a person who possesses the constitutional requisites for voting, or who could vote under the Constitution, should he see fit to do so; in other words, one who has no disabilities other than those of a temporary character, such as, for example, those relating to registration. The constitutional requisites for voting are thus set forth: "Every male citizen of twenty-one years of age and upwards, excepting paupers and persons under guardianship, who shall have resided within the Commonwealth one year, and within the town or district in which he may claim a right to vote six calendar months next preceding any election of governor, lieutenant-governor, senators, or representatives, shall have a right to vote in such election." This is further limited by a provision that "No person shall have the right to vote . . . who shall not be able to read the Constitution in the English language, and write his name." It is provided, however, that this limitation shall not apply to any person prevented by physical disability from complying with its requisitions, or to any person who had a right to vote at the time of the adoption of the amendment under which the limitation was made, namely, May 1, 1857, or to any person who was 60 years of age *at that time.*

Registered voters constitute the voting force fully equipped and in the field for political action at any particular time. This force varies in numbers according to the varying conditions of different political campaigns. Besides these active voters there is always a reserve corps made up of those who for various reasons are not registered, but who constitute, nevertheless, part of the voting strength of the State. The legal voters, as included in

the tables we are now considering, comprise both the active and reserve voters. They represent, in fact, the maximum voting strength of the State.

In the census taken in 1905, the persons who were polls, and not aliens, but who nevertheless were not voters, constitute 5.79 per cent of the total polls. This class includes persons who had passed their twentieth birthday at the date of the census, and also persons under guardianship, and others who, although polls, are debarred by the constitutional provisions just cited. The aliens, or persons of foreign birth without the right of franchise on account of insufficient length of residence in the country, or those who, although residents here sufficiently long, have neglected to acquire citizenship, constitute 20.91 per cent of the total polls. In 1895, 5.85 per cent of the polls were not voters, and 20.96 per cent were aliens. In the present census the total voters number 674,174. Of these 72.56 per cent are native born and 27.44 per cent, foreign born. By way of comparison, it may be stated that the native-born voters in 1875 constituted 80.27 per cent of the total voters, in 1885, 77.69 per cent, and in 1895, 75.37 per cent. These percentages, taken in connection with that shown in the present census, exhibit a constant decline during the 30 years. The naturalized voters constituted 19.73 per cent of the total voters in 1875, the percentage rising to 22.31 per cent in 1885, and 24.63 per cent in 1895, and now forming 27.44 per cent.

Table 75 shows for the State and for the 33 cities the male population by native and foreign born; the number of native and foreign-born males of voting age; the number of legal voters;[1] the percentage that the legal voters bear to the total male population; the number of naturalized voters; the percentage the naturalized voters bear to the total foreign-born male population; the number of aliens; the number of foreign-born males who had resided in Massachusetts over five years on May 1, 1905; and the percentage the foreign-born males of voting age bear to the total number of foreign-born males.

This table is sufficiently descriptive without an extended analysis, though it might be well to point out the manner of reading it: Taking the line for the "State" as an example, — the male population of the State was 1,461,589, of which 1,016,993 were native born, and 444,596 were foreign born; the number of males of voting age, that is, males 21 years of age and over, was 905,583, of which 520,049 were native born and 385,534 foreign born; of this number (905,583), 674,174 were legal voters, including 185,012 naturalized voters, the naturalized voters forming 41.61 per cent of the total foreign-born males. There were also 192,344 aliens, *i.e.*, persons of foreign birth who were not naturalized. On May 1, 1905 there were 323,094 persons of foreign birth who had completed five years or more of residence in Massachusetts.

[1] This number must not be confounded with "registered" voters.

Considering the length of residence in Massachusetts on May 1, 1905 of the total foreign-born population (918,044) we obtain the following showing:

TABLE 76. *Length of Residence of Foreign-born Population in the State.—Numbers and Percentages.*

CLASSIFICATION.	NUMBERS			PERCENTAGES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
Under 2 years,	37,382	31,210	68,592	8.41	6.59	7.47
2 to 5 years,	82,918	79,599	162,517	18.65	16.81	17.70
Over 5 years,	323,094	360,738	683,832	72.67	76.20	74.49
Unknown,	1,202	1,901	3,103	0.27	0.40	0.34
TOTAL FOREIGN BORN,	444,596	473,448	918,044	100.00	100.00	100.00

The total foreign born, as stated, numbered 918,044. Of this number, 683,832 have resided in Massachusetts more than five years, and they form 74.49 per cent of the total number of foreign born. Considering only the males, namely, 444,596, we find that 323,094 have resided in Massachusetts for more than five years, and they form 72.67 per cent of the total foreign-born males. There were 82,918 foreign-born males who had resided in this country between two and five years, and they form 18.65 per cent of the total foreign-born male population. Therefore, in 1910 they will be legal voters if they have complied with the necessary requirements of law.

N. Population Classified by Illiteracy.

One of the most important uses of the census is the opportunity which it affords of ascertaining once in 10 years, at least, the number of illiterates among the people. In consideration of this question, it is necessary to know not only the number of persons 10 years of age and over so affected, but also to ascertain as well their degree of illiteracy, that is, to what extent they are illiterate. For this purpose, the illiterate in the State are classified in the census according to (*a*) the number who *cannot read but can write*, (*b*) the number who *cannot write but can read*, and (*c*) the number who *can neither read nor write*. Having made a careful enumeration of the illiteracy as regards these points, it is easy to determine the preventable and unpreventable elements of illiteracy; that is, we can determine the exact proportion which can be reached and overcome, and the proper methods for its suppression, as well as the part which is unavoidably beyond statutory and other regulations.

The presentation of the results for illiteracy in the present census is complete as showing the comparative prevalence of illiteracy in the cities and towns in the State. Considering illiteracy according to the degree, we have a distribution, without regard to sex, by native and foreign born in the following table:

TABLE 77. *Degree of Illiteracy Among Native and Foreign Born, 1905.*

DEGREE OF ILLITERACY.	NUMBER OF ILLITERATES			PERCENTAGES		
	Native Born	Foreign Born	Totals	Native Born	Foreign Born	Totals
Cannot read,	10	38	48	0.10	0.03	0.04
Cannot write,	1,210	11,831	13,041	11.93	10.18	10.32
Neither read nor write,	8,920	104,387	113,307	87.97	89.79	89.64
TOTALS,	10,140	116,256	126,396	100.00	100.00	100.00

We find that there were reported 10 native-born persons who could not read, 1,210 who could not write, and 8,920 who could neither read nor write. It must be remembered that illiteracy is only considered for persons 10 years of age and over. We find 38 among the foreign born who could not read, 11,831 who could not write, and 104,387 who could neither read nor write. It is interesting, yet distressing, to note that 89.64 per cent of the illiterates, including both native and foreign born, were unable to either read or write.

In Table 78 we show for cities and towns containing 8,000 inhabitants and over in 1905, the number of native-born and foreign-born illiterates and the percentage which the number in each specified city or town bears to the total number of illiterates in the State. Of the 126,396 illiterate persons in the State, 68.65 per cent were found in the cities, 10.07 per cent in the 27 towns containing 8,000 population and over, and 21.28 per cent in the 294 towns with less than 8,000 population. Of the total number of illiterates, 16.91 per cent were found in Boston, — the largest percentage found in any city. The next highest was found in Fall River, which contained 9.04 per cent of the total number of illiterates in the State. Cambridge had 2.14 per cent; Springfield, 2.05 per cent; Malden, 0.69 per cent; Newton, 0.62 per cent; Beverly, 0.29 per cent; and Melrose, 0.13 per cent, — cities which should not show any great number of illiterates in their population.

O. Population Classified by Military Service.

An attempt was made in the Census of 1905 to obtain an enumeration of the total number of persons living in the Commonwealth on May 1, 1905 who served either as soldiers, sailors, or marines in the War of the Rebellion, the number who served in the recent Spanish-American War and in the Philippines, and the number who could be classed as belonging to the Massachusetts Volunteer Militia. The returns were not so complete as a subsequent re-canvass showed, but so far as the returns are consistent with previous efforts, they are, and should be, accepted. The number designated as Civil War veterans undoubtedly includes some soldiers who were enrolled in the regular army service but who were not in service in the Civil War. It is possible that wives, on account of their failure to understand clearly the nature of the inquiry, which was applicable only to

service in the Rebellion, may in some instances have returned their husbands as soldiers when they were merely enrolled in the Massachusetts Volunteer Militia, and *vice versa*. The same is applicable to the Spanish War. It is but proper to say that if such instances occurred, in spite of efforts to guard against them, it was impossible to detect the error, since no means of verification were available to the Bureau. The figures, therefore, while undoubtedly in the main correct, should be regarded as approximate rather than absolute.

TABLE 79. *Veterans and Militiamen, 1905. — Numbers and Percentages.*

CLASSIFICATION.	Numbers	Percentages
Civil War veterans,	26,160	62.88
Spanish War veterans,	7,033	16.91
Massachusetts Volunteer Militia,	8,407	20.21
TOTALS,	41,600	100.00

P. Other Presentations.

Besides the presentations which have been analyzed in the preceding pages, Volume I contains:

1. Censuses of Population: 1765–1905, — tables which give facts concerning the names, area, boundaries, date of incorporation, and increase or decrease in population between censuses for each city, town, and county (pages 803–902).

2. Public and Private Schools, — tables which show for each city and town the number and kind of schools, value of buildings and of property, and for private schools the additional information of amount of endowment, income, whether incorporated, etc. (pages 903–944).

3. Libraries and Reading Rooms, — tables giving for libraries the number, value, circulation of books, endowment, income, and the number having reading rooms, and for reading rooms the number of works of reference, newspapers, periodicals, seating capacity, and the number of persons using reading rooms (pages 945–981).

POPULATION

AND

SOCIAL STATISTICS.

POPULATION AND SOCIAL STATISTICS.

The presentation is arranged alphabetically by counties as follows: Barnstable, Berkshire, Bristol, Dukes, Essex, Franklin, Hampden, Hampshire, Middlesex, Nantucket, Norfolk, Plymouth, Suffolk, and Worcester.

Under each county the cities and towns are arranged alphabetically, and for each of these civil divisions the statistics of Population, Sex, Native Born and Foreign Born, Color and Race, Conjugal Condition, Number of Families and Average Size, Relation to Head of Family, Place of Birth of native-born and foreign-born persons, Length of Residence in Massachusetts of Foreign-born Persons, Parent Nativity, Grandparent Nativity, Political Condition, Illiteracy, Occupations, and Veterans and Militia are given. It will be noted that, by this new manner of arrangement, reference to a particular city or town will supply all the desired information under the headings cited, instead of obliging reference to several tables, as has been required in previous arrangements of Census statistics.

The proper reading of the table requires some explanation, and particular reference is made to the showing for the town of Barnstable, which is given on pages 7 and 8.

Native Born and Foreign Born.

The first division of the table is simple and easily understood. It shows the respective number of native born and foreign born, by sex, in the cities and towns under consideration.

Color and Race.

The five divisions of color and race used in the Census are white, colored, Chinese, Japanese, and Indian. The line "Colored" relates entirely to those belonging to the Negro race.

Conjugal Condition.

The four divisions of conjugal condition are single, married, widowed, and divorced. The line "Unknown" includes persons for whom the facts as to conjugal condition could not be ascertained.

Families.

The three divisions under the heading "Families" are private families, hotels, and institutions. The average size for all families is given, together with the averages for private families, hotels, and institutions, respectively. The word "institution" does not mean, necessarily, a public institution like an almshouse or an insane asylum. It includes all public and private institutions as well as all government stations or public buildings which might be the abode of one or more persons. The object of the subdivision is to arrive at the actual average size of the private family. The average usually given has been affected, sometimes to a material extent, by the presence of hotels or a large institution. As a marked instance of this fact, it may be stated that there is a town in the State in which the persons in a public institution number more than the remaining population of the town. In taking an average this institution would be considered as one family, but it is evident that the resultant of the average size of family for the town would be very nearly twice as large as that for the private families if figured separately.

Relation to Head of Family.

As, for Census purposes, a family includes all collections, large or small, of people living under a common roof, this subdivision of the table shows, in addition to those who are relatives by blood, those having relationships by reason of marriage, adoption, etc. In order to save space, certain condensations have been made in the classification lines. For instance, instead of the line "Fathers-in-law or

mothers-in-law," it has been condensed so as to read "Fathers or mothers-in-law." The following lines show similar condensation: Stepfathers or mothers, grandfathers or mothers, brothers or sisters-in-law, adopted sons or daughters, sons or daughters-in-law, stepsons or daughters, and grandsons or daughters.

Place of Birth.

The distribution of the population by place of birth is next shown and gives, by sex, the number born in each State or in the Territories, for native-born persons, and the number born in each of the principal Foreign Countries, for foreign-born persons. Of the persons born in Massachusetts, the number is given respectively for those born in the town or city in which enumerated; for those born in other towns or cities in the State; and for those concerning whom the distinction is not specified and for whom the place of birth is returned simply as "Massachusetts." For persons born in Canada the results are subdivided, showing the number of persons born in Canada of English and French extraction, respectively. The italic letters, *n. s.*, following United States and Foreign born are abbreviations of the words "not specified." For the cities the detail of Austria, Germany, and South America is given. In order to save space "American citizens (born abroad)" is condensed to "Am. citizens (born abroad)."

Length of Residence in Massachusetts of Foreign-born Persons.

It must be borne in mind that this subdivision relates entirely to *foreign-born* persons and shows the respective number of males and females, together with the total for both sexes, who have lived in Massachusetts less than two years, two to five years, inclusive, and those who have been resident more than five years.

Parent Nativity.

This part of the presentation is also divided into two parts, one relating to the native born and the other to the foreign born. Under the heading "Native Born" is given the number of males and females, together with the total for both sexes, whose fathers were born in the States, Territories, or insular possessions specified. As the birthplace of the father legally determines the nationality of the child, the birthplace of the mother has not been taken into account in arriving at the statistics of parent nativity. The same rule is followed in the second division relating to the foreign born, where each foreign country is specified by name, the figures indicating the number of males, females, and the total for both sexes, whose fathers were born in the foreign country specified.

Grandparent Nativity.

This is a new presentation in any Census statistics. Its preparation was undertaken with the view of determining, so far as possible, what is known as the "native stock;" that is, the number of native-born persons whose fathers were native born and whose grandparents were native born. It is given for native-born and foreign-born persons and shows the number of males and females, with the total for both sexes, whose grandparents were either native born, foreign born, of mixed grandparentage, or whose grandparentage was unknown.

Political Condition.

Under this heading is given the number of ratable polls, legal voters, naturalized voters, and aliens. An additional line shows the number of males 20 years of age and over. A *ratable poll* is any male person 20 years of age or over, whether of native or foreign birth, not a pauper. Upon each ratable poll on the lists of the Commonwealth a head tax, or poll tax, of $2 a year is laid. By *legal voters* are meant those native-born male persons 21 years of age and over, and every foreign-born male person 21 years of age or over who has been naturalized, not an idiot, pauper, or convict, who has resided in the State one year and in the city or town in which they lived at the time the Census was taken for a period of at least six months. *Naturalized voters* include those male persons of foreign birth, 21 years of age or over, who have complied with the naturalization laws of the United States either by their own act or that of their father. *Aliens* include those foreign-born

male persons, 21 years of age or over, who have not complied with the naturalization laws. The number of males 20 years of age and over should correspond very closely with the number of ratable polls, although there are certain exemptions under the law which would be likely to make the number of ratable polls less than the number of males 20 years of age and over as reported.

Illiteracy.

The statistics of Illiteracy relate only to those persons 10 years of age and over. The statistics are classified under the headings "Native Born" and "Foreign Born," with specification as to number of males, females, and the total of both sexes. The classification "Illiteracy" includes those who cannot read, cannot write, and can neither read nor write in any language, these latter being considered as totally illiterate.

Occupations.

There are 20 general classes of occupations, as follows: Government Service, Professional Service, Domestic Service, and Personal Service; those engaged in Trade, Transportation, Agriculture, and The Fisheries; those employed in Manufactures; those engaged in Mining; General (or day) and Farm Laborers; Apprentices; Children at Work from 10 to 15 years of age (no child can be legally employed in Massachusetts in any branch of industry under the age of 14 years, nor when 14 or 15 years of age, that is, under 16 years, unless provided with a school certificate to show that the child has received the number of weeks' schooling required by law); Scholars; Students; persons who have retired from active business; those who were unemployed during 12 months of the Census year; those dependent in whole or in part upon public or private charity for their support; those "At Home," principally children under five years of age, and children from five to 10 years of age who for some reason are not at school; and Not Stated, principally young persons or adults, of working age, who, for some reason, have no occupation, or for whom no occupation was returned.

Veterans and Militia.

This part of the table shows the number of Civil War veterans, Spanish-American War veterans, and the number of persons belonging to the Massachusetts Volunteer Militia at the present time, or, in many cases, those who have belonged to it previously.

Subsidiary Tables and Recapitulations.

The presentation, which has been described in detail, is followed by subsidiary tables and recapitulations under the headings previously enumerated and considered, showing the results by counties and for the State. For instance, if the reader wishes to know how many native-born males there were in the Commonwealth; how many white persons; how many divorced persons; the number of private families; how many heads of families there were; how many nephews and nieces; the number of persons living in Massachusetts who were born in the State of New Hampshire; how many were born in Ireland; how many foreign-born persons had lived in the State less than two years; how many persons had fathers born in Maryland or in Maine; how many persons had fathers born in England or Nova Scotia; how many persons in the State were of native birth; how many persons have native-born parents and grandparents; the number of legal voters or aliens; the number of totally illiterate foreign-born males; the number of persons engaged in manufactures; and the number of Civil War veterans, etc., the desired information may be found in the State recapitulations.

AGES.

AGES.

The classification of ages by years is shown in four tables, giving the number of persons by sex and totals, for each year, respectively, and for those less than one year old by months, in each town, city, county, and for the State.

In some of the tables the classification by native and foreign born is also supplied. The tables are self-explanatory and are designated as follows:

AGES: UNDER 1 TO 80 YEARS AND OVER. For Towns, Cities, Counties, and the State.

AGES: UNDER 1 TO 80 YEARS AND OVER. For the Cities and the State by Native and Foreign Born.

AGES: UNDER 1 YEAR, IN DETAIL BY MONTHS. For Towns, Cities, Counties, and the State.

AGES: 80 YEARS AND OVER, IN DETAIL. For Towns, Cities, Counties, and the State, with a recapitulation for Counties and the State by Native and Foreign Born.

AGES:

UNDER 1 TO 80 YEARS AND OVER.

[1] Less than one one-hundreth of one per cent.

NOTE. On page 688, at the close of the presentation for native and foreign born, two recapitulations are given, one for the State, and the other for the State and Counties, by sex. In the first recapitulation, the total population is taken as the basis for figuring percentages for native born and foreign born, and the number of native born and foreign born males and native born and foreign born females. In the second recapitulation, the whole number of males is taken as 100 per cent in figuring the percentages of native born and foreign born males, and the whole number of females is taken as 100 per cent in figuring the percentages of native born and foreign born females. The use of these different bases causes a slight variation in the percentages for the State in the two recapitulations, and this explanation is supplied in order that these variations may not be considered errors in computation.

The same variations occur in the percentages on page 704, at the close of the presentation for color and race, and in the tables on pages 720 and 721, the explanation of these variations previously given being equally applicable thereto.

VILLAGES: BY TOWNS.

VILLAGES: BY TOWNS.

[This presentation shows the number of males, females, and both sexes and the number of legal voters for those towns for which distinct villages were returned, and the same facts for the several villages of which these towns are composed. The population which lies outside of the well-defined limits of the villages is included under the name of the town itself, which is, of necessity, repeated under its own name in order to present the total population for the town.]

KIND OF HABITATION.

(*A*) THE STATE AND COUNTIES.
(*B*) CITIES AND WARDS.

KIND OF HABITATION.

The following presentation shows the kind of habitation and number of families and population for the State and counties and for cities and wards, arranged alphabetically, except Boston which is presented first. The classification includes dwelling houses, hotels, business blocks, club houses, camps, vessels or boats, stables, shanties, and institutions, etc. Families living in dwelling houses are divided into the number with boarders and the number without boarders.

The manner of reading the table is as follows: For the State we find 90,404 families *with* boarders, having a population of 561,963, living in dwelling houses; 562,690 families *without* boarders, with a population of 2,349,987, living in dwelling houses; 871 families of 15,932 persons living in hotels; 2,408 families of 4,371 persons living in business blocks; 161 families of 723 persons living in club houses; 154 families of 597 persons living in camps; 110 families of 319 persons in vessels or boats; 740 families of 1,521 persons in stables; 1,345 families of 4,534 persons in shanties; and 1,170 families of 63,733 persons in institutions, etc.

Lines for the counties or cities may be read in a similar manner.

There are 21 families in the State living in places other than as classified. These places of abode include railroad stations, school and church basements, cars, tents, etc. (See explanation in foot-notes on page 785). Seven of these families are living in the cities and the remaining 14 are living in the following towns:

Bourne, 1 family of 1 living in a railroad station.
Provincetown, 1 family of 1 living in a school basement.
Brimfield, 1 family of 1 living in a railroad station.
West Springfield, 1 family of 9 living in a car barn.
Lincoln, 1 family of 1 living in a dog kennel.
Natick, 1 family of 5 living in a greenhouse.
Millis, 1 family of 10 living in a tent.
Needham, 2 families of 2 living in a car.
Wellesley, 1 family of 1 living in a greenhouse.
Wrentham, 1 family of 1 living in a church.
Northbridge, 1 family of 3 living in a church basement.
Shrewsbury, 1 family of 3 living in a church basement.
Winchendon, 1 family of 24 living in a car.

KIND OF HABITATION.

CENSUSES OF POPULATION: 1765-1905.

DATES OF INCORPORATION, CHANGES IN NAMES, AREA, BOUNDARIES, POPULATION, ETC., FOR COUNTIES, CITIES, TOWNS, AND THE STATE.

CENSUSES OF POPULATION 1765–1905.

The presentation which follows gives, in a brief manner, the date of incorporation, or establishment, of every city and town in the State, arranged alphabetically, together with changes in area, boundaries, etc. In the case of a number of the older towns it has been found that there is no official record of the date of establishment; therefore, we have, in such cases, given the date when the first mention of the town name is to be found in the official records of the State, together with the title of the book of records, the number of the volume, and the page. The early spelling in all such cases has been retained as a matter of permanent record. These dates have been taken from the reports of the Commissioner of Public Records.

Following the historical facts relative to each city and town is given the population by each Census between 1765 and 1905, a period of 140 years.

In the case of the towns of Adams, Mount Washington, New Ashford, and Washington in Berkshire County, Merrimac in Essex County, Erving and Hawley in Franklin County, and Brockton (city), East Bridgewater, and West Bridgewater in Plymouth County, and also in the case of the counties of Franklin, Hampden, and Norfolk population figures appear prior to the dates given for incorporation. This is due, undoubtedly, to the fact that the territory in question was well defined and recognized in Census enumerations prior to the date of its formal incorporation, or establishment, as a county, district, or town. In the case of the town of Merrimac the Census returns for the town of Amesbury, of which it constituted a part at the time of the taking of the State Census in 1875, were divided after the enumeration was completed and the results for Merrimac, which was made a town in 1876, were presented separately.

The population is also given for such districts, gores, or unincorporated tracts of land, towns, etc., which have been ceded to other States, or annexed to existing towns and cities in this State and have ceased, therefore, to have a separate corporate existence. The towns and districts which were ceded to other States are as follows: Boston Corner, ceded to the State of New York in 1853 (see Mount Washington, Berkshire County), and Pawtucket, by a change in boundary line, annexed in 1861 to the State of Rhode Island (noted under Seekonk, Bristol County). The gores, etc., for which population is given for 1790 and a tract of land designated as "No-town," for which the population is given for 1830, are as follows: For 1790, in Berkshire County, gore adjoining Adams and Windsor, gore adjoining Williamstown; in Worcester County, gore adjoining Fitchburg, gore adjoining Leominster, gore adjoining Oxford, gore adjoining Princeton, gore adjoining Sturbridge; and, for 1830, in Worcester County, No-town.

The cities and towns which have become a part of the city of Boston by annexation are as follows: Town of Brighton (Middlesex County), in 1873; city of Charlestown (Middlesex County), in 1873; town of Dorchester (Norfolk County), in 1869; city of Roxbury (Norfolk County), in 1867; and town of West Roxbury (Norfolk County), in 1873. The population of these cities and towns has been included in the counties in which they were existent previous to annexation, but an historical description of them has been included under the city of Boston, together with the population, from the date of first mention, or establishment, to the date of annexation. The rule has been followed of incorporating the historical facts regarding all obsolete districts or towns with the notes relative to the cities or towns of which they now form a part.

The Provincial Censuses of 1765 and 1776 have been taken from an abstract of the State Census for 1865, in which they were reproduced, with corrections, from printed and manuscript returns, which appeared to be the only authentic records of these counties in existence. For certain towns, for which no returns seem to have been made, the population has been supplied from the next succeeding census in which returns for these towns are reported, the figures in all such cases being enclosed in brackets, thus, [2,610].

The Census returns for 1765 do not include Indians, of which there were 1,569 in the State, distributed in Barnstable, Berkshire, Bristol, Dukes, Middlesex, Nantucket, and Plymouth counties, and while the returns for 1776 present details by towns for white persons, 4,761 colored population were not included in the totals for the State. The colored population was distributed among all of the counties. The figures representing the population of Indians and colored persons have been included under the showing "The State," and in a foot-note is noted the distribution by counties and numbers under these two Censuses.

CENSUSES OF POPULATION: 1765–1905.

TOWN OF ABINGTON.

Established June 10, 1712, from part of Bridgewater and certain lands adjoining, as "Abingdon." Part included in the new town of Hanover June 14, 1727. Boundary line between Abington and Weymouth (Norfolk County) established March 31, 1847. Boundary line between Abington and Randolph (Norfolk County) established March 21, 1861. Boundary line between Abington and Hingham established March 21, 1861. Part established as Rockland March 9, 1874. Part included in the new town of South Abington (now Whitman) March 4, 1875.

TOWN OF ADAMS.

Established October 15, 1778, from the plantation called East Hoosuck. The plantation called New Providence annexed April 10, 1780. Part of Adams included in the new town of Cheshire March 14, 1793, and on April 16, 1878, a part was set off and established as North Adams. The date of establishment of this town is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

TOWN OF AMESBURY.

Established May 27, 1668, from a part of Salisbury. On May 12, 1675, boundary lines were allowed to Amesbury. Part of Salisbury called "Little Salisbury" annexed March 15, 1844. Part of Amesbury established as Merrimac April 11, 1876. Another part of Salisbury was annexed by Act of June 16, 1886, taking effect July 1, 1886.

TOWN OF AMESBURY — concluded.

CENSUSES OF POPULATION: 1765-1905—Continued.

TOWN OF ANDOVER.

First mentioned May 22, 1646, in Massachusetts Records, Volume II, page 159, "Cochicawick now called Andiver." Boundary line between Andover and Billerica (Middlesex County) established May 26, 1658. Boundary line between Andover and "Wills Hill" established May 9, 1678. Part of Andover included in the new town of Middleton June 20, 1728. Part of Andover included in the new town of Lawrence April 17, 1847. Part of Andover established as North Andover April 7, 1855. Part of Andover annexed to Lawrence February 4, 1879. Boundary line between Andover and Tewksbury established May 21, 1903. Boundary line between Andover and North Reading established April 22, 1904.

TOWN OF ARLINGTON.

Formerly called "West Cambridge" being established as such February 27, 1807, from a part of Cambridge. Part of Charlestown annexed February 25, 1842. Part included in the new town of Winchester April 30, 1850, and another part included in the new town of Belmont March 18, 1859. Boundary line between West Cambridge and Belmont established January 31, 1861. Boundary line between West Cambridge and Cambridge established and a part of each place annexed to the other place February 25, 1862. Name of West Cambridge changed to Arlington April 13, 1867; Act took effect April 30, 1867. By the Province Laws, Volume II, page 990, the plantation of Arlington in the county of Hampshire was established June 16, 1739, as the township of Winchester, but no Act has been found abolishing the town of Winchester.

TOWN OF BARNSTABLE.

There is no record of the date of establishment of this town. The first mention is found on page 31 of Volume XI of the Plymouth Colony Records wherein it is stated that, among other representatives to the General Court, the member for Barnstable was Mr. Thom. Dimmack. This was on March 5, 1638. The town was established from common land and the first recorded attempt at defining its boundaries was on June 17, 1641, when the boundary line between Barnstable and Yarmouth was established. On March 2, 1652, it was enacted that the Bounds between Barnstable and Sandwich "to be" established; evidently meaning "shall be." Barnstable and Yarmouth agreed upon boundary line March 11, 1658. On June 3, 1662, additional lands were granted to Barnstable. On June 10, 1662, the boundaries between Barnstable and Sandwich were again ordered to be established. Boundary line between Barnstable and Mashpee established March 28, 1894.

Charlestown.

First mention of Charlestown occurs in Mass. Records, Vol. I, p. 73, August 23, 1630, where it is stated that the first Court of Assistants was held at "Charlton." Boundary lines between Charlestown and Newe Towne (now Cambridge, Middlesex County) established March 6, 1632. Boundary lines between Charlestown and Boston established July 8, 1635. Boundary lines established "eight miles into the country from their meeting house" March 3, 1636. Boundary lines between Charlestown and Boston established March 28, 1636. "Lovels Iland is graunted to Charlestowne, provided they imploy it for fishing by their own townsmen or hinder not others," October 28, 1636. Certain common lands granted to Charlestown May 13 and October 7, 1640. "The Iland called Lovels Iland" granted to Charlestown, "provided half the timber and fire-wood shall belong to the garrison at the castle," October 27, 1648. One thousand acres of land granted to Charlestown November 12, 1659. Certain common lands granted to Charlestown October 21, 1663. The grant made November 12, 1659, renewed October 19, 1664. Part of Charlestown established as Stoneham (Middlesex County) December 17, 1725. Parts of Charlestown annexed to Cambridge April 18, 1761, March 6, 1802, February 12, 1818, and June 17, 1820. Part of Medford (Middlesex County) annexed to Charlestown June 21, 1811. Part of Charlestown annexed to West Cambridge (Middlesex County) February 25, 1842. Part of Charlestown established as Somerville (Middlesex County) March 3, 1842. Charlestown incorporated as a city February 22, 1847. Act of incorporation accepted by the town March 10, 1847. By Act of May 14, 1873, Charlestown was annexed to the city of Boston, the Act being accepted by both cities October 7, 1873, taking effect January 5, 1874.

Charlestown — concluded.

TOWN OF BRIMFIELD.

First mentioned August 16, 1722, in a list of frontier towns. The town incorporated December 24, 1731; the Act of incorporation, which is lost, passed both Houses to be enacted on this date, and was signed by the Governor before February 2, 1732, when the Legislature was prorogued. Part included in the new town of Western (now Warren, Worcester County) January 16, 1742. Part established as the District of Monson April 28, 1760. Part established as the District of South Brimfield September 18, 1762. Boundary lines definitely established February 7, 1763.

CITY OF BROCKTON.

Originally established as North Bridgewater June 15, 1821, from part of Bridgewater. Boundary line between North Bridgewater and West Bridgewater established January 26, 1825. Name authorized to be changed March 28, 1874. Brockton adopted as the name May 5, 1874. Part annexed to South Abington (now Whitman) and parts of East Bridgewater and South Abington annexed April 24, 1875. Brockton incorporated as a city April 9, 1881. Act of incorporation accepted by the town May 23, 1881. Part of West Bridgewater annexed to Brockton, if the Act is accepted by Brockton, May 8, 1893. Act accepted by Brockton November 7, 1893, taking effect March 1, 1894. Act of May 8, 1893, amended March 12, 1894. The date of establishment of North Bridgewater is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory was well defined and recognized in census enumerations prior to the date of its formal incorporation as a town.

TOWN OF CHILMARK.

There is considerable ambiguity concerning the date of establishment of this town and of Tisbury. In the New York State Book of Patents, Volume IV, page 73, under date of July 8, 1671, appears a grant headed "Tisbury Mannor." By it Governor Lovelace granted to Thomas Mayhew, Senior, and Thomas Mayhew, Junior, a certain island containing lands bought of the Indians called Chickemote, Keep-hickon, Quia-naimes, Nashowa-Kemmuck, together with two of the Elizabeth Islands called Kataymuck and Nanname-sitt, and several other small and inconsiderable islands in Monument Bay to be called and known by the name of "Tysbury Mannor." September 14, 1694, Chilmark is mentioned in the Tax Act (also Tisbury). On June 17, 1696, it was Resolved, the constable of Chilmark empowered to collect the tax levied in 1694, while on October 30, 1714, it was Resolved, "the Mannour of Tisbury, commonly called Chilmark" to have all the powers of a town; whether under the name of Chilmark or Tisbury is not stated. Boundary lines between Chilmark and Gay Head, as established May 9, 1855, confirmed May 28, 1856. Part of Chilmark known as Elizabeth Islands established as Gosnold March 17, 1864. Boundary line between Chilmark and Tisbury established February 27, 1882.

TOWN OF DIGHTON.

Established May 30, 1712, from the South Precinct of Taunton. Part of Dighton included in the new town of Berkley April 18, 1735. Boundary lines reported by a committee March 2, 1743, and established January 8, 1745. Part of Dighton annexed to Berkley February 26, 1799. Part of Dighton established as Wellington June 9, 1814. Boundary line established between Dighton and Wellington and part of Dighton annexed to Wellington February 12, 1824. Dighton and Wellington united as one town February 22, 1826, if the Act is accepted previous to March 1, 1826. Act accepted by Dighton February 25, 1826. Wellington revived as a separate town June 16, 1827, to exist one year. Centre of main ship channel of Taunton Great River established as boundary line of Berkley, Dighton, Freetown, Fall River, and Somerset March 17, 1847. Part of Dighton annexed to Somerset April 4, 1854.

TOWN OF DUNSTABLE.

Certain men were empowered October 17, 1673, to begin a plantation beyond Chelmsford and Groton but no name was given to it. A marginal note in the Mass. Records, Vol. IV, Part 2, p. 570, says, "a plantation about Groaton, called Dunstable." On October 13, 1680, Dunstable is mentioned in a military list (Mass. Records, Vol. V, p. 295). Part established as Nottingham (N. H.) January 4, 1733. Part included in the new town of Litchfield (N. H.) July 4, 1735. Part established as the District of Tyngsborough June 22, 1789. Part annexed to the District of Tyngsborough March 3, 1792. Parts of Groton annexed February 25, 1793, January 26, 1796, and June 18, 1803. Boundary lines between Dunstable and Tyngsborough established January 29, 1798, and a part of Dunstable annexed to Tyngsborough. Boundary line between Dunstable and Tyngsborough established June 10, 1814. Boundary line between Dunstable and Groton established February 15, 1820.

TOWN OF EAST BRIDGEWATER.

Established June 14, 1823, from part of Bridgewater. Boundary line between East Bridgewater and Bridgewater established February 23, 1838. Boundary line between East Bridgewater and Bridgewater established and part of each town annexed to the other town March 20, 1846. Part of Halifax annexed and boundary line established April 11, 1857. Part included in the new town of South Abington (Whitman) March 4, 1875. Part annexed to Brockton April 24, 1875. The date of establishment of this town is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

TOWN OF EASTHAM.

Originally called "Nawsett." The first known record is found in Volume VIII of the Plymouth Colony Records, wherein Nawsett is mentioned, on page 177 under the year 1643, in the list of "towns" having freemen able to bear arms. On March 3, 1645, according to Volume II of the Plymouth Colony Records, certain common lands "lying between sea and sea" were granted to those who go to dwell at "Nossett." On June 2, 1646, Nawsett was established as a township, and on June 7, 1651, the name of the town of Nawsett was changed to Eastham. March 5, 1678, according to the Records, Eastham and purchasers on both sides were to settle on the boundary lines. June 16, 1763, a part of Eastham was established as the District of Wellfleet. A part of Harwich annexed July 14, 1772. Part of Eastham established as Orleans March 3, 1797, and on March 9, 1839, another part of Eastham was annexed to Orleans. A part annexed to Wellfleet April 26, 1847. Boundary line between Eastham and Orleans established and a part of each town annexed to the other town March 23, 1867. The boundary line between Eastham and Wellfleet at tidewater established May 6, 1877.

TOWN OF ERVING.

Established April 17, 1838, from the common lands called "Erving's Grant." Boundary line between Erving and Orange established February 27, 1841. Part of Northfield called "Hack's Grant," annexed February 10, 1860. The date of establishment of this town is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

TOWN OF HAWLEY.

Established February 6, 1792, from the plantation called "Number Seven." A certain part of the plantation Number Seven, accidentally omitted in the boundary description, annexed to Hawley March 9, 1793. Part of Hawley annexed to the District of Plainfield (Hampshire County) June 21, 1803. The date of establishment of this town is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

TOWN OF HULL.

The date of establishment of Hull is not positively known. On May 20, 1642, according to Mass. Records, Vol. I, p. 5, a report of a committee was made to the General Court concerning the allotment of lands at Nantasket, said report being dated "9th of the 2d month," 1642. "Nantaskot" is again mentioned May 10, 1643, as being within the shire of Suffolk. On Sept. 7, 1643, a former grant to "Nantascot" was confirmed. On May 29, 1644, it was ordered "that Nantascot shall be called Hull" and on May 26, 1647, Hull is mentioned as a town.

TOWN OF MARSHFIELD.

On March 2, 1641, it was "enacted by the Court that Green's Harbour shall be a township . . . and that it shall be called by the name Rexhame" (Plymouth Colony Records, Vol. XI, p. 37). On the same date, but in Vol. II, p. 9, of Plymouth Colony Records, "Rexame" is in the list of places for which constables were chosen. On June 1, 1641, Rexhame is mentioned in a list of towns and the name then disappears from the records. Name of Rexhame was changed to Marshfield about this time though the transaction was not recorded. On March 1, 1642, Marshfield is mentioned as one of the towns for which officers were chosen (Plymouth Colony Records, Vol. II, p. 34). Boundary lines established March 7, 1643. Certain lands granted to Marshfield and Duxbury March 5, 1661. Boundary line between Marshfield and Duxbury established February 23, 1683. Part included in the new town of Pembroke March 21, 1712. Part of Scituate annexed March 10, 1788. Boundary line between Marshfield and Duxbury established June 14, 1813. Boundary line between Marshfield and Scituate established May 11, 1887.

TOWN OF MASHPEE.

Established June 14, 1763, as the District of Mashpee, to remain in force three years. Above Act revived March 20, 1767, to remain in force until July 1, 1770. On November 15, 1770, Act again revived, and to remain in force until the end of the session of the General Court next after November 1, 1775. On February 9, 1776, the Act was again continued in force until the end of the session next after November 1, 1779. On November 25, 1779, the Act again continued until November 1, 1785. On June 13, 1788, the above Act was repealed and three "Guardians to the Proprietors" appointed, Act to remain in force for 10 years. March 7, 1797, the last named Act made perpetual until repealed by the Legislature. Part of the plantation of Marshpee annexed to Sandwich, February 26, 1811. On March 31, 1834, the "Plantation of Marshpee" established as the "District of Marshpee," to be under the guardianship of a commissioner appointed by the Governor. A part of the land formerly in the plantation of Marshpee annexed to Falmouth March 17, 1841, and part to Sandwich April 1, 1859, and another part to Sandwich March 13, 1860. May 28, 1870, the District of Marshpee abolished and the town of Mashpee established. Part of Sandwich reannexed to Mashpee March 19, 1872. Boundary lines established as follows: between Mashpee and Falmouth June 18, 1885; between Mashpee and Sandwich May 27, 1887, and a part of Sandwich annexed; and between Mashpee and Barnstable March 28, 1894. Part of the boundary line between Mashpee and Sandwich established and part of Sandwich annexed to Mashpee April 20, 1905.

Boundary line between Mount Washington and Egremont established June 17, 1817, and part of each town annexed to the other town. Boundary line between Mount Washington and the District of Boston Corner established March 12, 1847. The District of Boston Corner was established April 14, 1838, from common land, but owing to its inconvenient location was a constant source of annoyance, being the resort of prize fighters and other law breakers, who were there secure from the jurisdiction of the State, and for this reason the district was ceded to the State of New York May 14, 1853. The population of Boston Corner was 67 in 1790; 92 in 1820; 64 in 1830; 65 in 1840; and 73 in 1850. The date of establishment of Mount Washington is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

TOWN OF NATICK.

First mentioned in Mass. Records, Vol. V, p. 227, on April 16, 1679, relative to an exchange of land made between the plantation of Natick and Sherborn, said exchange being ratified by the General Court May 30, 1679. Boundary line between Natick and Dedham (Norfolk County) established October 18, 1701. In the Province Laws, Vol. III, p. 234, "the plantation of Natick, belonging to no particular town" is mentioned June 28, 1745. On February 28, 1762, the Parish of Natick is established as the District of Natick. On February 19, 1781, the District of Natick made the town of Natick, being an Act confirmatory of the general Act of August 23, 1775. Boundary line between Natick and Needham (Norfolk County) established and part of each town annexed to the other town June 22, 1797. Part of Sherborn annexed February 7, 1820. Boundary line between Natick and Wayland established April 26, 1850. Part annexed to Framingham April 22, 1871.

TOWN OF NEW ASHFORD.

Established as a district February 26, 1781, from land called New Ashford, lying between Adams, Hancock, Lanesborough, and Williamstown. Part of the district of New Ashford included in the new town of Cheshire March 14, 1793, and on February 6, 1798, another part was annexed to Cheshire.

TOWN OF NEW ASHFORD — concluded.

Part of Hancock annexed to the district of New Ashford June 26, 1798. On May 1, 1836, the district was made a town by Chapter 15 of the Revised Statutes. Boundary line between New Ashford and Hancock established May 20, 1851. The date of establishment of this town is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

CITY OF NEWTON.

As recorded in Mass. Archives, Vol. CXII, p. 421, December 15, 1691, the petition of the inhabitants of "Cambridge Village sometimes called Little Cambridge" for a name for their town was granted, the name to be Newton and the town's brandmark to be N. An island in Charles River annexed June 21, 1803. Part annexed to Roxbury April 23, 1838. Part annexed to Waltham April 16, 1849. Newton incorporated as a city June 2, 1873. Act of incorporation accepted by the town October 13, 1873. Boundary line between Newton and Boston established May 29, 1874. Part of Boston annexed May 5, 1875; Act accepted by Newton June 23, 1875, taking effect July 1, 1875. Boundary line between Newton and Brookline established March 28, 1907.

CITY OF NEWTON — concluded.

1905 (State)	1,300	–

TOWN OF PLYMOUTH.

The first mention of Plymouth in the records is in "Plimouth's great Book of Deeds of Lands Enrolled," under the date of 1620. The boundary line between Plymouth and Sandwich established January 19, 1663, not being recorded, was ordered to be entered on the Records of the Court June 7, 1670. Part established as Plympton June 4, 1707. Part established as Kingston June 16, 1726. A plantation in Plymouth called "Agawam" included in the new town of Wareham July 10, 1739. Part annexed to Wareham January 20, 1827.

TOWN OF PLYMOUTH — concluded.

CENSUSES OF POPULATION: 1765-1905—Continued.

TOWN OF PRESCOTT.

There is considerable ambiguity about the early establishment of this town. In the Mass. Records, Vol. III, p. 302, on May 18, 1653, it is stated: "Considering that there is already at Nashaway about 9 families . . . this Court doth hereby give and grant them liberties of a township and at the request of the inhabitants do order it to be called 'Prescott.'" This record is confusing in regard to Nashaway, which appears to have been made Prescott, West Towne, and Lancaster by one Act (See Lancaster, Worcester County). Parts of New Salem (Franklin County) and Pelham established as Prescott January 28, 1822.

TOWN OF PRINCETON.

Established as the District of "Prince-town" October 20, 1759, from part of Rutland and certain common lands adjacent. The district and all lands adjacent not belonging to any town or district established as Princeton April 24, 1771. All lands which did not belong to Princeton when it was a district set off as they were before the passage of the Act of April 24, 1771, on March 6, 1773. Part of Hubbardston annexed February 16, 1810. Part of the common lands of No Town annexed April 4, 1838. Part of Westminster annexed April 22, 1870.

TOWN OF SEEKONK.

Established February 26, 1812, from a part of Rehoboth. A portion of the territory was called Pawtucket (established March 1, 1828), and by Act of April 10, 1861, all of Pawtucket, except that part lying easterly of Seven Mile River, was annexed to Rhode Island and new boundary lines established. The excepted part of the above territory was annexed to Seekonk. On January 29, 1862, a municipal district by name of East Seekonk established to consist of the excepted territory named in the Act of April 10, 1861. Said district to cease "so soon as the proper officers of the future town of Seekonk shall have been elected and qualified." Population of Pawtucket was, for 1830, 1,459; 1840, 2,184; 1850, 3,753; 1855, 4,132; and 1860, 4,200.

TOWN OF SWANSEA.

Established as "Swansey" March 5, 1668, from a part of Rehoboth called the "Township of Wannamoisett," and places adjacent. A neck of land called "Papasquash Neck," excepting 100 acres, annexed July 5, 1669. Boundary line between Swansea and Rehoboth established August 11, 1670. Boundary lines established July 5, 1679. Boundary line between Swansea and Mount Hope "to be" established November 1, 1679. Part of Swansea established as Somerset February 20, 1790. The name of this town is variously spelled. It is derived from Swansea in Wales, Rev. John Miles, who came here from Wales with a part of his church in 1663, being the first minister. The termination of the Welch name is "sea." Notwithstanding this, the spelling that appears in the earliest records of the town is Swansey, and this was retained in the records until 1718, after which it was changed to Swanzey, this continuing consecutively, or nearly so, until 1865, when the form Swansey was again adopted, and from that date to the present the name has been so spelled in the town records. The State Department of the Commonwealth, however, following ancient departmental and legislative usage, still retains the form Swanzey. On the other hand, the U. S. departmental usage, including the name of the post office, is Swansea. The name of the railroad station of the town is similarly spelled by the railroad corporation, and this form is used in the legislative manual. It would seem to be historically accurate if the Welsh derivation is taken into account, and the others seem to be corrupt spellings, that of Swansey being the more ancient. The form Swansea is also taught in the public schools of the town, is in use by a large proportion of the people, and so far as usage is concerned, any other spelling is rapidly becoming obsolete. This manner of spelling the name has been used in the State Censuses since 1875, and is therefore retained in the present Census.

TOWN OF WASHINGTON.

Established April 12, 1777, from the plantation called "Hartwood" and several contiguous grants. Part of Washington included in Lee October 21, 1777. Part of Washington included in Middlefield (Hampshire County) March 12, 1783. Parts of Washington annexed to Lenox January 31, 1795, and February 18, 1802. The date of establishment of this town is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

COUNTY OF DUKES.

This county was incorporated November 1, 1683, by the State of New York, to which it belonged, and contained the Island of Nantucket, "Martins" Vineyard, Elizabeth Island, and No-Man's Land. By the Province Charter of 1692 the "Isles of Cappawock and Nantuckett near Cape Cod" were granted to the Province of Massachusetts Bay. On June 13, 1693 (Province Laws, Volume I, page 117), the "Islands of Capawock, alias Martha's Vineyard," are referred to, and on June 22, 1695 (Province Laws, Volume I, page 216), it was ordered that the "Islands of Martha's Vineyard, Elsabeth Islands, the islands called No-man's land and all the dependencies formerly belonging to Dukes County (the island of Nantucket only excepted) shall be and remain, and continue to be one county to all intents and purposes, by the name of Dukes County."

COUNTY OF FRANKLIN.

Incorporated June 24, 1811, from a part of Hampshire County; Act took effect December 2, 1811. The date of incorporation of this county is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a county.

COUNTY OF NORFOLK.

On May 10, 1643, the Colony was divided into four counties: Essex, Middlesex, Suffolk, and Norfolk. The latter was composed of the towns of Haverhill, Salisbury, Hampton, Exeter, Dover, and Strawberry Bank (Portsmouth). The four last-named towns having been "taken off," upon the separation of New Hampshire from Massachusetts, January 1, 1680, the others were set back to Essex February 4, 1680, and the original county of Norfolk ceased to exist. The present Norfolk County was incorporated March 26, 1793. The date of incorporation of this county is subsequent to the date of the earliest census in which population appears. It is evident that the territory was well defined and recognized for census purposes prior to the date of its formal incorporation as a county.

[1] Includes population in 1790 of the following gores: adjoining Oxford, 237; adjoining Sturbridge, 64; adjoining Leominster, 27; adjoining Fitchburg, 14; adjoining Princeton, 26; total, 368; and for 1830, a tract of land called No-town, 69.

CENSUSES OF POPULATION: 1765-1905—Concluded.

RECAPITULATION. FOR THE STATE.

THE STATE.

The Commonwealth of Massachusetts covers part of the territory originally granted to the Plymouth Company of England. It grew out of the consolidation of the colonies of Plymouth and Massachusetts Bay. The settlement at Plymouth began with the landing of the Pilgrims, December 22, 1620. The colony of Massachusetts Bay originated with the settlement under John Endecott at Salem, in 1628. In 1643, a confederacy was formed consisting of the colonies of Massachusetts Bay, Plymouth, Connecticut, and New Haven. In 1692, under a new charter given by William III, the colonies of Massachusetts Bay and Plymouth were consolidated as a royal province, including also Maine. In 1780, after the Revolution, the present State Constitution was adopted. In January, 1788, the Constitution of the United States was ratified by Massachusetts. The colonists in New Hampshire, in 1641, as a measure of protection and defence against the Indians, allied themselves with the colony of Massachusetts Bay and remained part of said colony until 1679, when New Hampshire was made a separate royal province, Massachusetts thereby losing part of its territory, January 1, 1680 (see Norfolk County). The territory now comprising the State of Maine was set off from Massachusetts by an Act passed March 3, 1820, taking effect March 15, 1820. By the Province Charter of 1692, certain islands now comprising the county of Dukes County and Nantucket County were ceded to Massachusetts from New York (see county of Dukes County). Certain common lands in Berkshire County, known as the District of Boston Corner, were ceded to the State of New York May 14, 1853 (see town of Mount Washington, Berkshire County). By a settlement of a boundary controversy between Massachusetts and Rhode Island, certain exchanges of territory were made between these States April 10, 1861 (see Fall River, Seekonk, and Westport).

[1] Includes 1,569 Indians distributed by counties as follows: Barnstable, 515 (of which 230 were in Mashpee); Berkshire, 221 (in Stockbridge); Bristol, 167 (principally in Dartmouth and Freetown); Dukes, 313 (of which 188 were in Chilmark); Middlesex, 37 (in Natick); Nantucket, 93; Plymouth, 223.

[2] Includes 4,761 colored population distributed by counties as follows: Barnstable, 171; Berkshire, 216; Bristol, 585; Dukes, 59; Essex, 1,049; Franklin, Hampden, and Hampshire (one county), 245; Middlesex, 702; Nantucket, 133; Plymouth, 487; Norfolk and Suffolk (one county), 682; Worcester, 432.

PUBLIC AND PRIVATE SCHOOLS.

SCHOOLS AND SCHOOL PROPERTY.

PUBLIC SCHOOLS.

[In the following presentations the school buildings are classified according to the grade or grades taught therein. The term "ungraded" has been used to designate mixed schools where pupils of several grades are taught in the same room. Unoccupied schoolhouses, available for school purposes, if needed, are included. If used wholly for other purposes, although originally school buildings, they have been excluded. In giving the number and value of buildings owned, dormitories and boarding-halls have been included, as in many cases they form part of the school building itself.]

[1] Evening schools are held in day school buildings.

[2] The town holds a contract with the trustees of Westford Academy by which it is used as the high school of the town.

[3] Warren Academy is no longer open as an academy, but the trustees maintain a summer school in manual training, cooking, and sewing, which is free to city pupils.

[4] In addition, one grammar school is located in hired rooms in Warren Academy. Value of school property is included.

[5] Under high school grade.

[6] Manual training is taught free in a private institution, which furnishes all equipment.

[7] The primary school is located in the town hall building.

[8] Pupils residing in old Braintree receive free tuition at Thayer Academy.

[9] The evening schools are held in two of these buildings and their valuations are included.

[1] Evening school is held in high school building.

[2] High school pupils receive instruction at Nichols Academy, the town paying $1,000 annually for the privilege. Evening schools are held in day school buildings.

[3] Evening schools are held in day school buildings.

[4] Located in a primary-grammar building.

[5] Unoccupied.

[6] High school pupils are given the use of the armory for drill purposes. Value of furniture and property is included.

[7] Five unoccupied.

[8] The Bromfield High School is a private benefaction governed by trustees, but tuition is given to pupils free of expense to the town.

[9] High school is located in the library building. The value given under "Buildings" is that of school furniture only.

[10] High school pupils receive instruction at Leicester Academy, the town paying $2,000 annually for the privilege.

[11] A new high school building is in course of erection, total cost estimated $158,000.

[12] Under high school grade.

Lyman School for Boys (Westborough, Worcester Co.),	2	59,750	2,050
State Primary School (Monson, Hampden Co.),	[6] –	150	48
Mass. School for Feeble Minded (Waltham, Middlesex Co.),	2	46,000	2,400

[1] Under the law, commitments from Chelsea, Revere, and Winthrop in Suffolk County must be to the truant school for the county of Middlesex.

[2] This school is supported by the city of Boston.

[3] Occupies one room in a building used for other purposes.

[4] In addition to the State schools, there is the Massachusetts Nautical Training School, on board the U. S. S. Enterprise, which was loaned to the Commonwealth by the United States government in November, 1892. At that time the Navy Department expended $20,000 in repairs to the ship on condition that the State should spend some $13,000 additional in putting the Enterprise in proper condition.

[5] These eight buildings are cottages partly used for other purposes. The returns for the branch at Bolton are included. Value under "Buildings" is for furniture only.

[6] Occupies one room in a building used for other purposes in connection with Massachusetts Hospital for Epileptics. Value under "Buildings" is for furniture only.

FREE ACADEMIES.

[These are "free" academies, because although they are owned and controlled by private corporations, through a board of trustees, free tuition is given to pupils of the towns in which they are located. The endowment and income are given in some cases.]

SCHOOLS AND SCHOOL PROPERTY.

PRIVATE SCHOOLS.

[The hired rooms, private dwellings, etc., referred to in the foot-notes are always in addition to the buildings reported in the table as owned or hired. In giving the number and value of buildings owned, dormitories and boarding-halls have been included, as in many cases they form part of the school building itself. The value of furniture in buildings and rooms hired is included in the value of buildings owned. There were no private schools returned for the county of Barnstable.]

LIBRARIES AND READING ROOMS.

LIBRARIES AND READING ROOMS.

In the presentations which follow, the statistics for libraries relate to the number of libraries, the number, value, and circulation of books, the amount of endowment, income, value of buildings, and number having reading rooms; for reading rooms the number of works of reference, including all other kinds of books, newspapers and periodicals, the seating capacity, and the number of persons using reading rooms are given. These statistics are for the Census year ending June 30, 1905.

In the presentation relating to libraries, the classification of "Free public," "Other secular," and "Religious" is given for cities and towns; while in the county and State recapitulations, the following classification is used:

Secular.		*Religious.*
Free public	Hospital	Church
Association	Club	Church and Sunday school
Public school	Institution	Sunday school
Private school	Private circulating	Association
College	Society	Theological
Science	State	Society
Art	U. S. government	
Medical		

By "Institution" is meant libraries connected with prisons, houses of correction, and other penal and charitable institutions, and maintained for the use of the inmates thereof. In other respects the designations are considered sufficiently explicit without particular explanation. A classification similar to that of the county and State is shown on page 981 for reading rooms for the State.

The value returned for books is the combustible value, that is, the amount that might be claimed from an insurance company to replace them if destroyed by fire.

LIBRARIES AND READING ROOMS.

READING ROOMS: NUMBER, READING MATTER, ETC.

[In this presentation, the reading rooms returned for each city and town are secular reading rooms, unless otherwise specified. "Number reporting" signifies the number of reading rooms from which a return of the information specified was received. Under "Works of Reference" has been included the total number of books, whether of reference or otherwise, returned from the reading rooms.]
